ADMISSION CRITERIA – ONCOLOGY

Admission / Transfer from:

☒ Emergency ☐ Outpatient (OPD) ☐ Ward ☐ Operation Theater ☐ Others:

Tick (✓) any of the following criteria requiring admission / transfer to ONCOLOGY

- ☒ For Chemotherapy-Day Care or IP Admission as per the Type of Chemotherapy
- ☐ Febrile Neutropenias (ANC <500 cells / mm³)
- ☐ Neutropenic Enterocolitis
- ☐ Mucositis Induced Significant Diarrhea or Pain
- ☐ Neurological Complications (like Seizures, Bleeding, Thrombosis) that can arise while on Chemotherapy Treatment or at the Time of Presentation and also for other Systemic Problems like Pancreatitis during Chemotherapy
- ☐ Management of Oncological Emergencies
- ☐ Bleeding Problems (where it is indicated)
- ☐ Evaluation and Management of Severe Anemias
- ☐ Day Care Admissions for PRBC Transfusions
- ☐ Evaluation and Management of Sick Children who come with Hematological Problems like Severe Anemia like Autoimmune Hemolytic Anemia/ Bleeding/ Others
- ☐ Primary Immunodeficiency Disorders with Infections that Warrants Hospitalisation
- ☐ Management and Evaluation of Hemophagocytic Lymphohistocytosis
- ☐ Any Systemic Disorders with Significant Hematological issues like JRA / SLE with Secondary HLH

DISCHARGE CRITERIA – ONCOLOGY

Discharge to:

☐ HDU / Step down ICU

☐ Ward

☐ Outside Facility

☐ Others:

Tick (✓) any of the following criteria requiring discharge / transfer from ONCOLOGY

- ☐ Completion of chemotherapy, with no debilitating side effects.
- ☐ Resolution of febrile episode, with no fever > 24hrs and Absolute Neutrophil count (ANC) > 500cells/mm³.
- ☐ Admitted patients - Once the admitting problem gets resolved or made a plan to manage further on out-patient basis.

DRUG CHART

Date of Admission: 11/7/25 Drug Allergies: Not known any Drug Allergies

FOR THE SAFETY OF THE PATIENT

- GENERAL** - Ensure that all patient details are entered above. ONLY A DOCTOR SHALL WRITE MEDICATION ORDERS.
- DOCTOR** - Please use only approved abbreviations (refer to Hospital's approved list of abbreviations).
 - Use approved pharmaceutical names, BLOCK LETTERS, metric dosage. English instructions.
 - Any changes in drug therapy must be ordered by a NEW PRESCRIPTION. Do not alter existing instructions.
 - Discontinue a drug by drawing a line **I** through it and a similar line through subsequent recording panels.
 - The date and time of stopping the drug along with the doctors name and sign must be mentioned.
 - Only one chart should be in use at any one time. When the chart is full, a new supplement can be kept within this drug sheet folder.
- NURSES** - Nurses must follow strictly the FIVE RIGHTS before administration of medication.
 1) Right Patient 2) Right Drug 3) Right Dosage 4) Right Route 5) Right Time
 - AVOID TAKING VERBAL ORDERS. NO VERBAL ORDERS FOR HIGH RISK/HIGH ALERT MEDICINES (EXCEPT FIRST DOSE OF EPINEPHRINE DURING CPR). Follow Hospitals's Verbal Order Policy.

Re-assessment Frequency:

- Every eight hours for all hospitalized patients.
- For post-surgical patients, patients with chronic pain, patient with severe pain:
 - At least every 2 hours for the first 24 hours
 - Then every 4 hours.
 - Prior to pain pain-relieving intervention.
 - Within 30 – 60 minutes after pain relief intervention.

PAIN ASSESSMENT TOOLS

FLACC PAIN ASSESSMENT SCALE (1 Month to 7 Years)

CATEGORY	SCORING		
	0	1	2
Face	No Particular expression or smile	Occasional Grimace or Frown, withdraw, Disoriented	Frequent to constant frown, quivering chin, clenched jaw
Legs	Normal Position or Relaxed	Uneasy, restless, tense	Kicking, or legs drawn up
Activity	Laying quietly normal position, moves easily	Squirming shifting back and forth, tense	Arched, rigid, or Jerking
Cry	No Cry (Awake or asleep)	Moans or whimpers occasional complaint	Crying steadily, screams of sobs, frequent complaints
Consolability	Content, relaxed	Reassured by occasional touching, hugging, or being talked to, distractible	Difficult to console or comfort

Numerical Pain Scale (Obstetric and Gynecology)

Neonatal Pain, Agitation and Sedation Scale (upto 1 Month)

Assessment Criteria	Sedation		Normal	Pain / Agitation	
	-2	-1	0	1	2
Crying Irritability	No Cry with painful stimuli	Moans or cries minimally with painful stimuli	Appropriate crying Not irritable	Irritable or crying at intervals consolable	High-pitched or silent-continuous cry Inconsolable
Behavior State	No arousal to any stimuli No spontaneous movement	Arouses minimally to stimuli Little spontaneous movement	Appropriate for gestational age	Restless, squirming Awakens frequently	Arching, kicking constantly awake or Arouses minimally / no movement (not sedated)
Facial Expression	Mouth is lax No expression	Minimal expression with stimuli	Relaxed Appropriate	Any pain expression intermittent	Any pain expression continual
Extremities Tone	No grasp reflex Flaccid tone	Weak grasp reflex decreased muscle tone	Relaxed hands and feet Normal Tone	Intermittent clenched toes, fists or finger splay Body is not tense	Continual clenched toes, fists, or finger splay Body is tense
Vital Signs HR, RR, BP, SaO₂	No variability with stimuli Hypoventilation or apnea	Less than 10% variability from baseline with stimuli	Within baseline or normal for gestational age	Increase 10-20% from baseline SaO ₂ 76-85% with stimulation - quick recovery	Increase greater than 20% from baseline, SaO ₂ less than or equal to 75% with stimulation - slow recovery Out of sync or fighting ventilator

Wong - Baker (Pediatrics) Above 7 Years

* NB: If GCS is below 12 or the Oxygen requirement is >3 Lit./min. , then irrespective of rest of the score, the Nurse MUST inform the PICU team.

CHILDREN'S OBSERVATION and EARLY WARNING SCORING TOOL

INSTRUCTIONS:

- The paediatric Early Warning Score i) seeks to identify the abnormal physiological finding seen during serious childhood illnesses and ii) offers a method to interpret such physiological derangements with clearly defined actions, ensuring that suitably experienced staff are involved with the care of the sickest children.
- The Early Warning Score does not replace clinical experience and acumen and should not be relied upon for such purpose.
- 6 clinical parameters are assessed and recorded as part of the child's routine clinical observation, providing a Early Warning Score between 0-6 (Higher Early Warning Score are seen in sicker children)
- Detailed actions are described according to increasing Early Warning Score.
- Some children with complex medical needs e.g. cyanotic heart disease may require modification to their trigger thresholds/ action plan- this should follow discussion with senior colleagues.
- Any Early Warning Score of 3 or above should be recorded below with details of any subsequent action initiated

Record Details when EARLY WARNING SCORE > 3			Record Time of Review and Plan		
Date	Time	Early Warning Score	Date	Time	Name

- If at any time additional help is required, call help – regardless of the Early Warning Score!
- Following a Early Warning Score assessment, senior help may be required

The SBAR communication tool (situation, background, assessment, recommendations) is a helpful mnemonic that can be used to describe a child's clinical condition to a colleague.

I	IDENTITY: I am (name), a nurse on ward (X). I am calling about (child X)
S	SITUATION : I am calling because I am concerned that ... (e.g. BP is low/high, pulse is XXX, Temperature is XX, Early Warning Score is XX)
B	BACK GROUND : Child (X) was admitted on (XX date) with (e.g. respiratory infection). They have had (X operation/ procedure/ investigation). Child (X)'s condition has changed in the last (XX mins). Their last set of observations were (XXX). The child's normal condition is ... (e.g. alert/ drowsy/ confused, pain free)
A	ASSESSMENT : I think the problem is (XXX) and I have ...(e.g. given O2/ analgesia, stopped the infusion), OR I am not sure what the problem is but child (X) is deteriorating, OR I don't know what's wrong but I am really worried.
R	RECOMMENDATION : I need you to ... come to see the child in the next (XX mins) AND I s there anything I need to do in the meantime ? (e.g. stop the fluid/ repeat observation)

Monitoring of Patient Intra – Procedure

Procedure Monitoring

Heart Rate (HR), Respiratory Rate (RR), Oxygen Saturation (O₂ Sat) continuously monitored, and Level of Consciousness (LoC) to be monitored and recorded minimally every 15 minutes until 15 minutes after the last administration of any sedation, then every 30 minutes, then every 1 hour until stable. Respiratory status to be monitored continuously.

Level of Consciousness (LOC):

- ☒ A - Alert
☐ V - Verbally Responsive
☐ P - Painfully Responsive
☐ U - Unresponsive

CONSENT FOR PROCEDURAL SEDATION

Authorization By: ☐ Patient ☒ Patient Attendant

I, the undersigned do hereby acknowledge the following:

- I have been made aware by the doctors in language known to me the details of sedation planned for the procedure
short sedation
- I have been made aware of the possible complications from the procedure of sedation as follows:
 - Changes in heart rate, blood pressure, need for oxygen supplementation, allergic reactions, upper airway obstruction, laryngospasm, conversion to general anaesthesia
- I have been made aware that the sedation is being advised to relieve pain and anxiety during the procedure. It will help me remain calm, comfortable, and cooperative, allowing the procedure to be performed smoothly and safely.
- I have been clearly explained about the benefits, risk, and alternative of the sedation which is General Anaesthesia.
- I authorize Dr. Srinidhi Rani and his / her team to perform the procedural sedation upon the patient / myself.
- I acknowledge that I fully understand the above information. I have had the opportunity to ask questions, and they have been answered to my satisfaction in a language I understand. I affirm that this consent is given by me in my full senses.

ప్రాసీజర్ల సెడేషన్కు అనుమతి పత్రం

అనుమతి ఇచ్చినవారు: ☐ రోగి ☐ రోగి అబ్సెండ్

నేను, దిగువ సంతకం చేసిన వ్యక్తి, క్రింది విషయాలను అంగీకరిస్తున్నాను:

నాకు తెలిసిన భాషలో, వైద్యులు ఈ క్రింది ప్రాసీజర్కు ఇచ్చే సెడేషన్ గురించి పూర్తి వివరాలు నాకు తెలిపారు:

- సెడేషన్ వల్ల సంభవించగల సాధ్యమైన క్రింది సమస్యలు/ప్రమాదాలు గురించి నాకు తెలిపారు: గుండె వేగం మారడం, రక్తపోటు మారడం, ఆక్సిజన్ అవసరం, అలర్జిక్ ప్రతిచర్యలు, ఎగువ శ్వాసనాళ అడ్డంకి, లాలింజోస్పాసమ్, జనరల్ అనస్థీషియాగా మారాల్సిన అవకాశం.
- ప్రాసీజర్ సమయంలో నొప్పి, భయం, ఆందోళన తగ్గించేందుకు సెడేషన్ ఇవ్వడం అవసరం అని నాకు వివరించారు. ఇది ప్రాసీజర్ సజావుగా, సురక్షితంగా జరగడానికి సహాయపడుతుంది.
- సెడేషన్కు సంబంధించిన ప్రయోజనాలు, ప్రమాదాలు, ప్రత్యామ్నాయం (జనరల్ అనస్థీషియా) గురించి నాకు స్పష్టంగా వివరించారు.
- డాక్టర్ _____ గారిని మరియు వారి బృందాన్ని, రోగి/నాపై ఈ ప్రాసీజర్ సెడేషన్ చేయడానికి నేను అనుమతిస్తున్నాను.
- పై సమాచారాన్ని నేను పూర్తిగా అర్థం చేసుకున్నాను. నాకు ఉన్న ప్రశ్నలన్నీ, నాకు అర్థమయ్యే భాషలో సమాధానమిచ్చారు. ఈ అనుమతిని నేను పూర్తి జ్ఞానస్థితిలో స్వచ్ఛందంగా ఇస్తున్నానని ధృవీకరిస్తున్నాను.

CONSENT FOR SPECIAL PROCEDURES

Patient Name : Jeshna Gender: ☐ Male ☐ Female

UHID No : Department : Oncology Date : 11/7/26

I S/D/W/O parent of Jeshna

Here by give consent for procedure of : CP + IT chemotherapy + BMA

For my patient, Named : Jeshna

The doctors have clearly explained to me that the procedure has following possible complications:

pain, bleeding, headache

The doctor have explained to me about the alternatives, risks and benefits for this procedure that :

Nil

I have understood the matter mentioned above in language known to me and give consent for the procedure.

Name of the Doctor performing the procedure: Ashankha

Patient Attendant :

Signature : S. Vidhya Li

Name : Vidhya

Relationship with Patient: Mother

Date & Time : 11/7/26

Witness :

Signature : CA

Name : Veera

Date & Time : 11/7/26 @ 1:30pm

Doctor (who is taking the consent) :

BRADEN 'Q' SCALE

					Date : 11/7			
					Time : 8 Am			
Mobility	1. Completely immobile: Does not make even slight changes in body or extremity position without assistance.	2. Very limited: Makes occasional slight changes in body or extremity position but unable to completely turn self independently.	3. Slightly limited: Makes frequent through slight changes in body or extremity position independently.	4. No limitations: Makes major and frequent changes in position without assistance.	4			
"Activity The degree of physical activity"	1. Bedfast : Confined to bed	2. Chairfast : Ability to walk severely limited or non-existent. Cannot bear own weight and/or must be assisted into chair or wheelchair."	3. Walks occasionally: Walks occasionally during day, but for very short distances, with or without assistance. Spends majority of each shift in bed or chair.	4. All patients too young to ambulate; OR walks frequently: Walks outside the room at least twice a day and inside room at least once every 2 hours during walking hours.	4			
Sensory Perception	1. Completely limited: Unresponsive (does not moan, flinch or grasp) to painful stimuli due to diminished level of consciousness or sedation, OR, limited ability to feel pain over most of the body surface.	2. Very limited: responds to only painful stimuli, cannot communicate discomfort except by moaning or restlessness; OR, has sensory impairment that limits the ability to feel pain or discomfort over half of body.	3. Slightly limited: Responds to verbal commands, but cannot always communicate discomfort or need to be turned; OR, has some sensory impairment that limits ability to feel pain, or discomfort in one or two extremities.	4. No impairment: Responds to verbal commands. Has no sensory deficit that would limit ability to feel or communicate pain or discomfort.	4			
Moisture Degree to which skin is exposed to moisture	1. Constantly moist: Skin is kept moist almost constantly by perspiration, urine, drainage, etc. Dampness is detected every time patient is moved or turned.	2. Very moist: Skin is often, but not always, moist. Linen must be changed at least every 8 hours.	3. Occasionally moist: Skin is occasionally moist, requiring linen change every 12 hours.	4. Rarely moist: Skin is usually dry, routine diaper changes; linen only requires changing every 24 hours.	4			
FRICION-SHEAR Friction Occurs when Skin moves against support surfaces Shear Occurs when skin and adjacent bony surface slide across one another	1. Significant problem: Spasticity, contracture, itching, or agitation leads to almost constant thrashing and friction.	2. Problem: Requires moderate to maximum assistance in moving. Complete lifting without sliding against sheets is impossible. Frequently slides down in bed or chair, requiring frequent repositioning with maximum assistance.	3. Potential problem: Moves freely or requires minimum assistance. During a move, skin probably slides to some extent against sheets, chair, restraints, or other devices. Maintains relative good position in chair or bed most of the time but occasionally slides down.	4. No apparent problem: Able to completely lift patient during position change, moves in bed and in chair independently and has sufficient muscle strength to life up completely during move. Maintains good position in bed or chair at all times."	4			
Nutritional Usual food intake pattern	1. Very Poor: NPO/or maintained on clear liquids, or IVs for more than 5 days OR albumin < 2.5 mg/dl OR never eats a complete meal. Rarely eats more than half of any food offered. Protein intake includes only 2 servings of meat or dairy products per day. Takes fluids poorly. Does not take a liquid dietary supplement.	2. Inadequate: Is on liquid diet or tube feedings/TPN, which provides inadequate calories and minerals for age OR albumin < 3 mg/dl OR rarely eats a complete meal and generally eats only about half of any food offered. Protein intake includes only 3 servings of meat or dairy products per day. Occasionally will take a dietary supplement.	3. Adequate: Is on tube feedings or TPN, which provide adequate calories and minerals for age OR eats over half of most meals. Eats a total of 4 servings of protein (meat, dairy products) each day. Occasionally will refuse a meal, but will usually take a supplement if offered.	4. Excellent: Is on a normal diet providing adequate calories for age. For example, eats most of every meal. Never refuses a meal. Usually eats a total of 4 or more servings of meat and dairy products. Occasionally eats between meals. Does not require supplementation.	4			
Tissue Perfusion & Oxygenation	1. Extremely compromised: Hypotensive (MAP < 50 mm Hg; < 40 in a newborn) or the patient does not physiologically tolerate position changes.	2. Compromised: Normotensive oxygen saturation may be < 95%; hemoglobin may be < 10 mg/dl; capillary refill may be > 2 seconds; serum pH is < 7.40.	3. Adequate: Normotensive oxygen saturation may be < 95%; hemoglobin may be < 10 mg/dl; capillary refill may be 2 seconds; serum pH is normal.	4. Excellent: Normotensive, oxygen saturation > 95%; normal hgb; capillary refill < 2 seconds.	4			
Severe Risk : less than 9 High Risk : 10-12 Moderate Risk : 13-14 Mild Risk : 15-18 Not at Risk: 19-23					TOTAL SCORE	28		
Docu. No. : RCHBH /FRM / CLINICAL / 119					Evaluator's Name	J		

Risk Score	Category	Action	Support Surfaces (Please Note: Only required for children who are deemed at risk due to altered mobility, consider occupation therapy referral for advice)
15-18	At Risk	• Regular Turning Schedule • Enable as much activity as possible • Protect the heels • Use pressure redistribution surfaces • Manage moisture, friction and shear • Advance to a higher level of risk if other major risk factors are present	High density foam mattress Gel pads for high-risk areas Alternating pressure mattress overlay
13-14	Moderate Risk	• Use the Same Protocol as for “At Risk” Patients • Position patient at 30 degree lateral incline using foam wedges	High density foam mattress Gel pads for high-risk areas Alternating pressure mattress overlay
10-12	High Risk	• Follow the same protocol as for “Moderate Risk” Patients • In addition to regular turning schedule • Make small shifts in their position frequently	High density foam mattress Gel pads for high-risk areas Alternating pressure mattress overlay
Less than 9	Severe Risk	• Use same protocol as for “High Risk” Patients • Add a pressure redistribution surface for patients with severe pain or with additional risk factors.	High density foam mattress Gel pads for high-risk areas Alternating pressure mattress overlay
