CONSENT FOR ANAESTHESIA

Authorization By: Patient Patient Attendant

Operative Procedure: ELECTIVE LOWER SEGMENT CAESAREAN SECTION

Anaesthesiologist: Dr. Adithi Surgeon: Dr. Rama Devi

Please read this before you consent for Anaesthesia

General anaesthesia involves rendering a patient unconscious before an operation. This ensures the patient is not aware of events and does not feel pain during the operation. Drugs given through a vein and / or inhaled from an anaesthesia machine produce it. Regional anaesthesia involves using a local anaesthetic to numb a specific area of the body for surgery: Prolonged pain relief can be achieved by infusing weak solutions of local anaesthetics and narcotic drugs to particular parts of the body after surgery or injury, using catheters.

Specific High Risk(s): The doctors have explained to me the details of the high risk involved due to the following medical problems and I have sought necessary clarification on all my doubts.

- Heart Disease Hypertension Diabetes Renal Failure Multi Organ Failure Hepatic Disorders
 Shock Obesity Chronic Obstructive Pulmonary Disease
 Others HYPOTENSION, PRURITUS, BRADY CARDIA, BRUCINIB

Declaration by Patient Attendant

- I authorize and give consent for anaesthesia as considered appropriate by the anaesthesia team
 Regional Anaesthesia General Anaesthesia Monitored Anaesthesia Care
- I understand that there are some infrequent complications that can occur due to use of anaesthesia, these include pain or some injury at the site of injections, temporary breathing difficulties, allergic reactions, headaches, variations in blood pressure, nausea and vomiting.
- I authorize the anaesthesia team to perform any additional procedures (for example, Central Venous Access, arterial line, use of suppositories and or nerve blocks for pain relief, changing from regional to general anaesthesia etc) which are considered necessary by them during the course of surgery.
- I also authorize and give consent to the team of doctors attending on me to administer blood products during the course of operative period and immediately thereafter if need arises.
- I acknowledge that the anaesthesiologist have informed me about the anaesthetic procedure, risk, benefits and alternative treatments.
- I acknowledge that I fully understand the above information. I have had the opportunity to ask questions, and they have been answered to my satisfaction in a language I understand. I affirm that this consent is given by me in my full senses.
