| <b>DIAGNOSIS</b>                        | <b>ICD CODE</b> |
|-----------------------------------------|-----------------|
| TERM ( 38 weeks + 3 days)/AGA/BABY GIRL |                 |

**History:** Baby Of ESHA AGARWAL is a term ( 38 weeks + 3 days) baby girl, delivered to a primi mother by emergency LSCS on 12.07.2026 at 08:35 pm with birth weight of 2.58 kgs in Rainbow Children's Hospital, Himayatnagar Hyderabad. Baby cried immediately after birth. Apgar scores were 8/10 at 1 min, 9/10 at 5 min. Inj. Vitamin K 1mg IM was given after delivery. Delayed cord clamping done. Fetal presentation was Vertex.

|              |                      |                       |              |
|--------------|----------------------|-----------------------|--------------|
| <b>Name</b>  | Baby Of ESHA AGARWAL | <b>UHID</b>           | HNH-00016544 |
| <b>IP No</b> | IP26-00006829        | <b>Admission Date</b> | 12-07-2026   |

**Maternal History:** Mrs. ESHA AGARWAL is a 30 years old primi mother.

G1 - Present pregnancy, spontaneous conception, had regular Antenatal checkup's, received 2 doses of Injection. Tetanus Toxoid. Antenatal scans were normal. No history of Pregnancy Induced hypertension/ Urinary Tract Infection/ Antepartum Haemorrhage/ Hypothyroidism/ Gestational Diabetes Mellitus/ Oligohydramnios/ Polyhydramnios/ Prolonged Rupture Of Membranes/ Fever.

**Mother's Blood group is AB positive. Baby's blood group is A positive.**

**Examination:** Baby was eutermic ( 36.5°F), euvolemic and was maintaining saturations at room air. On auscultation of chest, air entry was bilaterally equal with normal heart sounds. Bilateral femoral pulses well felt. Abdomen was soft with no organomegaly. Cry and activity were good. Anterior fontanelle was at level. No obvious external congenital anomalies were noted clinically. All external orifices were patent and open. All neonatal reflexes were normal.

**Anthropometry:**

Weight at birth : 2.58 kgs.  
Weight at discharge : 2.36 kgs.  
Head Circumference : 35 cms.  
Length : 40 cms.

**Investigations:** Enclosed reports.

**Management:**

**Course during hospital:**

Serum bilirubin at 48 hours of life was 11.7 mg/dl with indirect fraction of 11.6 mg/dl which comes under phototherapy range. Double surface phototherapy

|              |                      |                       |              |
|--------------|----------------------|-----------------------|--------------|
| <b>Name</b>  | Baby Of ESHA AGARWAL | <b>UHID</b>           | HNH-00016544 |
| <b>IP No</b> | IP26-00006829        | <b>Admission Date</b> | 12-07-2026   |

was advised, but parents were not willing.

**Feeding:** Breast feeding was initiated (First feed was given within 30 minutes). Baby tolerated the feeds well.

**Vaccination:** Baby was given following vaccination:

| <b>Vaccine Name</b> | <b>Status</b> | <b>Date</b> |
|---------------------|---------------|-------------|
| BCG                 | Given         | 13.07.2026  |
| OPV                 | Given         | 13.07.2026  |
| HEPATITIS B         | Given         | 13.07.2026  |

**TEOAE (Transient Evoked Otoacoustic Emissions): Hearing test:** To be done on follow up.

**Newborn screening advanced / Newborn screening-4:** To be done on follow up.

**SPO2 : 98% at room air**

**Red Reflex: Present & Symmetrical**  
**Hip Examination was normal.**

Parents are counselled about the nature severity of illness and possible prognosis of the child's condition. They were also counselled about the need for further hospital stay. However, parents were unwilling for further management on personal grounds and requested the child to be discharged. Hence, child is being Discharge on Request.

ACTIONS

NB: Scores 3 should be recorded overleaf

- Score 1 : Continue normal observation by staff nurse  
Score 2 : Shift in charge nurse to be informed and continue hourly observations  
Score 3 : Shift in charge AND ER doctor/Floor Registrar to see and half hourly to hourly Observation to continue.  
Score 4 : Shift in charge AND treating consultant(till 8 PM) or On call night duty consultant to see  
Score 5 & 6 : Shift incharge and PICU /NICU fellow or PICU/NICU consultant to be informed

\* NB: If GCS is below 12 or the Oxygen requirement is >3 Lit./min. , then irrespective of rest of the score, the Nurse MUST inform the PICU team.

CHILDREN'S OBSERVATION  
and EARLY WARNING SCORING TOOL

INSTRUCTIONS:

- The paediatric Early Warning Score i) seeks to identify the abnormal physiological finding seen during serious childhood illnesses and ii) offers a method to interpret such physiological derangements with clearly defined actions, ensuring that suitably experienced staff are involved with the care of the sickest children.
- The Early Warning Score does not replace clinical experience and acumen and should not be relied upon for such purpose.
- 6 clinical parameters are assessed and recorded as part of the child's routine clinical observation, providing a Early Warning Score between 0-6 (Higher Early Warning Score are seen in sicker children)
- Detailed actions are described according to increasing Early Warning Score.
- Some children with complex medical needs e.g. cyanotic heart disease may require modification to their trigger thresholds/ action plan- this should follow discussion with senior colleagues.
- Any Early Warning Score of 3 or above should be recorded below with details of any subsequent action initiated

| Record Details when EARLY WARNING SCORE >3 |      |                     | Record Time of Review and Plan |      |      |

- Following a Early Warning Score assessment, senior help may be required

The SBAR communication tool (situation, background, assessment, recommendations) is a helpful mnemonic that can be used to describe a child's clinical condition to a colleague.

|   |                                                                                                                                                                                                                                                                                                                                      |
|---|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| I | <b>IDENTITY:</b> I am (name), a nurse on ward (X). I am calling about (child X)                                                                                                                                                                                                                                                      |
| S | <b>SITUATION :</b> I am calling because I am concerned that ... (e.g. BP is low/high, pulse is XXX, Temperature is XX, Early Warning Score is XX)                                                                                                                                                                                    |
| B | <b>BACK GROUND :</b> Child (X) was admitted on (XX date) with (e.g. respiratory infection). They have had (X operation/ procedure/ investigation). Child (X)'s condition has changed in the last (XX mins). Their last set of observations were (XXX). The child's normal condition is ... (e.g. alert/ drowsy/ confused, pain free) |
| A | <b>ASSESSMENT :</b> I think the problem is (XXX) and I have ...(e.g. given O2/ analgesia, stopped the infusion), OR I am not sure what the problem is but child (X) is deteriorating, OR I don't know what's wrong but I am really worried.                                                                                          |
| R | <b>RECOMMENDATION :</b> I need you to ... come to see the child in the next (XX mins) AND I s there anything I need to do in the meantime ? (e.g. stop the fluid/ repeat observation)                                                                                                                                                |

**Total 24 hrs. Intake**

**Total 24 hrs. Output**

## FLUID CHART

Sheet No. : .....

1. All measurements in ml.
2. Add up each column separately. Make additions across the page to obtain 24 hrs. total of intake and output.

## FLUID CHART

Sheet No. : .....

1. All measurements in ml.
2. Add up each column separately. Make additions across the page to obtain 24 hrs. total of intake and output.

Rarely moist:</b><br>Skin is usually dry, routine diaper changes; linen only requires changing every 24 hours.                                                                                                                                                                   | 2                       | 2    | 4    | 4    |    |
| <b>FRICTION-SHEAR</b><br><b>Friction</b> Occurs when Skin moves against support surfaces<br><b>Shear</b> Occurs when skin and adjacent bony surface slide across one another | <b>1. Significant problem:</b><br>Spasticity, contracture, itching, or agitation leads to almost constant thrashing and friction.                                                                                                                                                                                                        | <b>2. Problem:</b><br>Requires moderate to maximum assistance in moving. Complete lifting without sliding against sheets is impossible. Frequently slides down in bed or chair, requiring frequent repositioning with maximum assistance.                                                                                                                    | <b>3. Potential problem:</b><br>Moves freely or requires minimum assistance. During a move, skin probably slides to some extent against sheets, chair, restraints, or other devices. Maintains relative good position in chair or bed most of the time but occasionally slides down.            | <b>4. No apparent problem:</b><br>Able to completely lift patient during position change, moves in bed and in chair independently and has sufficient muscle strength to life up completely during move. Maintains good position in bed or chair at all times."                         | 2                       | 2    | 4    | 4    |    |
| Nutritional Usual food intake pattern                                                                                                                                        | <b>1. Very Poor:</b><br>NPO/or maintained on clear liquids, or IVs for more than 5 days OR albumin < 2.5 mg/dl OR never eats a complete meal. Rarely eats more than half of any food offered. Protein intake includes only 2 servings or meat or dairy products per day. Takes fluids poorly. Does not take a liquid dietary supplement. | <b>2. Inadequate:</b><br>Is on liquid diet or tube feedings/TPN, which provides inadequate calories and minerals for age OR albumin < 3 mg/dl OR rarely eats a complete meal and generally eats only about half of any food offered. Protein intake includes only 3 servings of meat or dairy products per day. Occasionally will take a dietary supplement. | <b>3. Adequate:</b><br>Is on tube feedings or TPN, which provide adequate calories and minerals for age OR eats over half of most meals. Eats a total of 4 servings of protein (meat, dairy products) each day. Occasionally will refuse a meal, but will usually take a supplement if offered. | <b>4. Excellent:</b><br>Is on a normal diet providing adequate calories for age. For example, eats most of every meal. Never refuses a meal. Usually eats a total of 4 or more servings of meat and dairy products. Occasionally eats between meals. Does not require supplementation. | 2                       | 2    | 4    | 4    |    |

**Re-assessment Frequency:**

- Every eight hours for all hospitalized patients.
- For post-surgical patients, patients with chronic pain, patient with severe pain:
  - At least every 2 hours for the first 24 hours
  - Then every 4 hours.
  - Prior to pain pain-relieving intervention.
  - Within 30 – 60 minutes after pain relief intervention.

# PAIN ASSESSMENT TOOLS

**FLACC PAIN ASSESSMENT SCALE (1 Month to 7 Years)**

| CATEGORY      | SCORING                                      |                                                                             |                                                          |
|---------------|----------------------------------------------|-----------------------------------------------------------------------------|----------------------------------------------------------|
|               | 0                                            | 1                                                                           | 2                                                        |
| Face          | No Particular expression or smile            | Occasional Grimace or Frown, withdraw, Disoriented                          | Frequent to constant frown, quivering chin, clenched jaw |
| Legs          | Normal Position or Relaxed                   | Uneasy, restless, tense                                                     | Kicking, or legs drawn up                                |
| Activity      | Laying quietly normal position, moves easily | Squirming shifting back and forth, tense                                    | Arched, rigid, or Jerking                                |
| Cry           | No Cry (Awake or asleep)                     | Moans or whimpers occasional complaint                                      | Crying steadily, screams or sobs, frequent complaints    |
| Consolability | Content, relaxed                             | Reassured by occasional touching, hugging, or being talked to, distractible | Difficult to console or comfort                          |

**Numerical Pain Scale (Obstetric and Gynecology)**

**Neonatal Pain, Agitation and Sedation Scale (upto 1 Month)**

| Assessment Criteria                            | Sedation                                                |                                                             | Normal                                        | Pain / Agitation                                                                           |                                                                                                                                                         |

## NURSING CARE RECORD

Date: .....

**Goals**

- ☐ Maintain Airway and Oxygenation
- ☐ Relieve Pain & Discomfort
- ☐ Maintain Fluid Balance
- ☐ Improve Activity Tolerance
- ☐ Maintain Good Nutritional Status
- ☐ Maintain Skin Integrity
- ☐ Maintain Personal Hygiene
- ☐ Prevent Infection
- ☐ Meet Elimination Needs
- ☐ Ensure Safety
- ☐ Early Ambulation Reduce Anxiety
- ☐ Patient & Family Education
- ☐ Identify Potential Complications
- ☐ Any Others. Specify.....

3. Socio History: Siblings Yes / No

All information obtained from ☐ Mother ☐ Father ☐ Other Family Member

Newborn Screening Discussed: Yes / No

Nurse Name: Anurag

Signature: [Signature]

Date & Time: 12/7/26

### GENERAL CONSENT FOR TREATMENT

Patient Name: **Baby Of ESHA AGARWAL** Age : **0 Y 0 M 0 D 0 H**  
IP No: **IP26-00006829** Sex: **Female**  
Consultant: **Dr. DILNAZ FAROOQUI** Ward/Bed No: **4F -OT/CRDL-HNPDA-415-1**

The undersigned patient and I or responsible relative or person hereby consent to and authorize Rainbow Hospitals doctors and medical personnel to perform medical examinations, conduct routine investigations and administer medical treatments, outpatient procedures, minor dressings, vaccinations and immunizations during the course of the patient's care, as in patient.

Patient, be deemed advisable or necessary.

I understand that the confidentiality of all medical records shall be protected to the full extent of the Law. The undersigned also consent to the use of health related information/ audiovisuals of the patient for research & training purpose or for insurance coverage and while doing so confidentiality of the patient will be maintained at all times and this will not affect the care of the patient.

In giving my general consent to treatment, I understand that I retain the right to refuse any particular examinations, test, procedure, treatment, therapy or medication recommended or deemed medically necessary by treating doctors. I also understand that the practice of medicine is not an exact science and that no guarantee have been made to me as the results of my evaluation and I or treatment.

I understand that I shall not bring valuables to the Hospitals and that the Hospital will not be responsible for the loss, destruction or theft of my personal belongings. I assume full responsibility for all my personal items and release the Hospital from responsibility and liability for such personal items and valuables.

"I am aware that during the patient care it is inevitable that certain re-useable equipment shall be re-used after sterilization and disinfection. I am informed that the hospital assures maximum level of precaution and care in sterilizing and disinfecting the equipment and monitors the whole process as per evidence based guidelines".

Note:

1 We do not allow use of medication brought from outside by the patient.

2 I have received attendant passes as per my room category. I understand that I have to return it back at the time of final bill clearance. In case of failing the submission, I will pay 200/- Rs.

(Receivers Signature: *[Signature]*)

3 IP Guide book has been given to me and I have been explained about the Hospitals rules and policies.
