DISCHARGE SUMMARY

Consultant:

Dr. SURENDER RAO DUSA

MD (Pediatrics), Fellowship in Neonatology
SENIOR CONSULTANT PEDIATRICS

Diagnosis:

Very preterm (31 weeks)/AGA/Bwt: 1.9kgs/Baby Boy

Respiratory Distress Syndrome - MV- 1 dose of surfactant - Low flow oxygen

Suspected Sepsis

Coagulopathy - Injection Vitamin K

Hyperkalemia

Hypocalcemia

Neonatal Hyperbilirubinemia

Moderate Muscular VSD

Chronological age: 20 days

PMA: 33+6 weeks

History : Baby of ZEBA MUSKAN is a moderate preterm (31 weeks) / AGA / baby boy of birth weight 1.9 kgs, born to G3A2 mother delivered by Emergency Lower Segment Cesarean Section (Indication: Preterm labour with PPROM) on 21.06.2026 at 09:00 am at outside Hospital. Baby said to have cried immediately after birth. Apgar scores and resuscitation details were not known.

Name

Baby Of ZEBA
MUSKAN

UHID

VIH-00206131

Baby developed respiratory distress after birth for which baby was started on CPAP. Baby had episode of apnea for which baby was started on Injection Caffeine and in view of shock, Injection Adrenaline was given. In view of suspected sepsis, baby was started on Injection Piperacillin + Tazobactam and Injection Amikacin. In view of persistence of respiratory distress requiring higher pressures and ventilation, 1 dose of surfactant was given, baby was transported to NICU, Rainbow Children's Hospital, Karkhana, for further management.

Maternal History : Mrs. ZEBA MUSKAN is a 27 years old G3A2 mother with marital life of 6 years. Non consanguineous marriage. Mother's blood group is "A" Positive. Expected delivery date: 14.08.2026.

G1 : Miscarriage

G2 : Miscarriage

G3 : Present pregnancy, OI conception.

History of hypothyroidism since conception on Tablet Thyroxine 25 mcg

History of PPRM for 24 hours

History of Urinary tract infection present

She had regular antenatal checkups and antenatal scans were normal. There was no history of diabetes / Hypertension / Thyroid / Cardiac / Renal abnormalities. She received calcium, iron supplementation and TT prophylaxis.

On examination: At the time of admission, baby was euthermic and maintaining saturations on mechanical ventilator. His heart rate was 150/min, respiratory rate was 60/min, blood pressure was 59/39 (45) mmHg. Respiratory distress present On auscultation of chest, air entry was bilaterally equal. Hyperdynamic precardium was seen. Abdomen was soft without organomegaly. There were no obvious external congenital anomalies.

Weight on Admission :2.00 kgs

Name

Baby Of ZEBA
MUSKAN

UHID

VIH-00206131

Weight on Discharge :2.280 kgs

Head circumference : 31 cms

Length :45 cms

Baby blood group : "A" Positive (Blood group to be repeated after 4 months)

Investigations: Enclosed.

Management: Respiratory Distress Syndrome - MV- 1 dose of

surfactant: Baby was nursed in thermoneutral environment. His initial arterial blood gas showed pH 7.29, pCO₂ 41.9 mmHg, pO₂ 85 mmHg, HCO₃ 20.1 mmol/L, BE - 6.1 mmol/L. His initial chest x-ray showed mild haziness in right lung. In view of respiratory distress, baby was continued on mechanical ventilator. His ventilatory settings were optimized according to serial ABGs and chest x-rays. Baby was gradually weaned off mechanical ventilator on day 2 of life and continued on CPAP. As baby's respiratory distress gradually reduced, baby was weaned off from CPAP to low flow oxygen after 24 hours and then baby was continued on low flow oxygen till day 5 of life. On day 5 of life baby did not maintain saturations on room air, so baby was kept on low flow oxygen and again baby was shifted to room air on day 9 of life. On day 11 of life as baby was not maintaining on room air and again baby was kept on low flow oxygen, on day 16 of life baby was shifted to ward on low flow oxygen. As baby was maintaining saturations baby was weaned off to room air after 24 hours. At present, baby is maintaining saturations at room air.

Suspected sepsis: He was screened for sepsis and was started on IV fluids, IV antibiotics after sending blood culture. His initial hemogram showed hemogram 16.3 gm%, white blood cells count 16,320 cells/cumm, platelet count 1.63 lakhs/cumm, C-Reactive protein 25 mg/L. Serum electrolytes showed serum sodium - 141 mmol/L, serum potassium - 6.9 mmol/L, chloride - 107 mmol/L, serum calcium 6.9 mg/dl, blood urea 45.8 mg/dl, serum creatinine 1.4 mg/dl. Last hemogram done on 03.07.2026 showed hemoglobin 13.4 gm%, white blood cells count 14,190 cells/cumm, platelet count 3.46 lakhs/cumm. C-

Name

Baby Of ZEBA
MUSKAN

UHID

VIH-00206131

Reactive protein 5 mg/L. Blood culture sent at the time of admission was sterile. IV antibiotics stopped after 5 days.

Coagulopathy: Baby had deranged coagulation profile (PT 46 sec, INR 3.2, APTT 71 sec), for which Injection Vitamin K was given. Repeat coagulation profile showed improvement. (PT 21.0 sec, INR 1.5, APTT 41 sec).

Hyperkalemia: Baby had high serum potassium levels (6.9 mg/dl) for which appropriate correction was given. Repeat serum potassium levels showed improvement. Last serum potassium done on 06.07.2026 was 5.7 mg/dl.

Hypocalcemia: Baby had low serum calcium levels (6.9 mg/dl), for which Calcium correction was given. Last serum calcium done on 06.07.2026 levels was 11.2 mg/dl.

Neonatal Hyperbilirubinemia : Baby developed jaundice on day 2 of life with serum bilirubin of 7.2 mg/dl with direct fraction of 0.1 mg/dl and indirect fraction of 7.3 mg/dl for which double surface phototherapy was started. Repeat serum bilirubin done on 23.06.2026 was 4.8 mg/dl with direct fraction of 0.1 mg/dl and indirect fraction of 4.7 mg/dl which does not come under phototherapy range hence, phototherapy was stopped.

On day-5 of life (27.06.2026) serum bilirubin done showed 13.6 mg/dl with direct fraction of 0.2 mg/dl and with indirect fraction of 13.4 mg/dl, for which baby was started on double surface phototherapy. Repeat serum bilirubin done on 28.06.2026 showed serum bilirubin done showed 5.3 mg/dl with direct fraction of 0.1 mg/dl and with indirect fraction of 5.2 mg/dl. Last serum bilirubin done on 3.07.2026 which showed 9.1 total bilirubin direct 0.1 and indirect 9.0.

Feeding : Once hemodynamically stable, he was started on OG feeds on day-2 of life, which were increased gradually. Baby reached on full OG feeds on day-5

At the time of discharge: Baby was active, hemodynamically stable and maintaining saturations at room air, accepting feeds well.

Advice :

1. Warmth care.
2. Continue demand oral feeding.
3. Encourage breast feeding.
4. Immunization as per schedule.
5. Lactodex HMF sachet, 1 sachet with 25ml EBM each feed till further advice.
6. Vitamin D3 drops (1ml/800IU), 0.5 ml once daily till one year of age.
7. Syp. Ossopan-D 2.5ml thrice daily till further advice.
8. Zincovit drops 0.5ml once daily till further advice.
9. Mupirocin ointment for local application twice daily till further advice.
10. Iron drops to be decided on follow up.
11. Hearing test (AABR), 2D Echo to be done on follow up.
12. NSG to be done on 20.07.2026 (on day 28 of life).
13. Danger signs explained, need for oxygen while feeding explained
14. Kindly consult Dr. Surender Rao Dusa, Consultant Pediatrician & Neonatologist, on Monday (13.07.2026) in OPD with prior appointment (This consultation will be charged).

To take appointment for OPD consultation at Rainbow Children's Hospital, just dial one number 1800-2122 (between 8 a.m. to 8 p.m.) (or) log on to www.rainbowhospitals.in

X-RAY CHEST AP VIEW

Cardiothoracic ratio within normal limits.

No evidence of fracture of the ribs.

Clavicle and shoulder girdle normal.

No pneumothorax / pleural effusion.

NG tube, ET tube, UV line insitu.

Both lung fields are clear.

CP angles are clear.

Domes of diaphragm are normal.

Neurosonogram

FINDINGS:

Both the lateral and third ventricles are normal. No hydrocephalus.
Atrium of right lateral ventricle- 7.5 mm
Atrium of left lateral ventricle- 7.5 mm
Fourth ventricle is normal.
Posterior fossa structures are grossly normal.
No e/o intraventricular echoes.
Both thalami are normal.
No evidence of lenticulostriate artery calcification.

Impression

- 1. Mild lateral ventriculomegaly with cavum septum pellucidum**
- 2. Periventricular flare**

GENERAL CONSENT FOR TREATMENT

Patient Name:	Baby Of ZEBa MUSKAN	Age :	0 Y 0 M 1 D
IP No:	IP-00060438	Sex:	Male
Consultant:	Dr. SURENDER RAO DUSA	Ward/Bed No:	N 2F-NICU I/NICU 248

The undersigned patient and I or responsible relative or person hereby consent to and authorize Rainbow Hospitals doctors and medical personnel to perform medical examinations, conduct routine investigations and administer medical treatments, outpatient procedures, minor dressings, vaccinations and immunizations during the course of the patient's care, as in patient.

Patient, be deemed advisable or necessary.

I understand that the confidentiality of all medical records shall be protected to the full extent of the Law. The undersigned consent to the use of health related information/ audiovisuals of the patient for research & training purpose or for insurance coverage and while doing so confidentiality of the patient will be maintained at all times and this will not affect the care of the patient.

In giving my general consent to treatment, I understand that I retain the right to refuse any particular examinations, test, procedure, treatment, therapy or medication recommended or deemed medically necessary by treating doctors. I also understand that the practice of medicine is not an exact science and that no guarantee have been made to me as the results of my evaluation and I or treatment.

I understand that I shall not bring valuables to the Hospitals and that the Hospital will not be responsible for the loss, destruction or theft of my personal belongings. I assume full responsibility for all my personal items and release the Hospital from responsibility and liability for such personal items and valuables.

"I am aware that during the patient care it is inevitable that certain re-useable equipment shall be re-used after sterilization and disinfection. I am informed that the hospital assures maximum level of precaution and care in sterilizing and disinfecting the equipment and monitors the whole process as per evidence based guidelines".

Note:

1 We do not allow use of medication brought from outside by the patient.

I have received attendant passes as per my room category. I understand that I have to return it back at the time of final bill clearance. In case of failing the submission, I will pay 200/- Rs.

(Receivers Signature: )

3 IP Guide book has been given to me and I have been explained about the Hospitals rules and policies.

4 Financial and billing counseling has been done to me.

CONSENT FOR ADMISSION IN NEONATAL INTENSIVE CARE UNIT

Name: B/o Zeba Muskan Age: N/B Gender: Male ☒ Female ☐

UHID.No : 206131 Date: 22/6/26

I Mohd Tayyab Ahmeel S/o, D/o, W/o Mohd Sajjad Ahmeel hereby
declare that our patient Mr. / Ms. who is related to me as is
getting admitted in the Neonatal Intensive Care Unit of Rainbow Children's Hospital on 22/6/26

The doctors have explained to me in a language understood by me that my child has following health related issues :

9 PEPRIS (RDS)

The doctors have clearly explained to me that my patient B/o Zeba Muskan during his / her stay
in the Neonatal Intensive Care Unit may undergo various medical and surgical procedures like airway management, mechanical
ventilation, Umbilical Artery Catheter, Umbilical Vein and Arterial Lines, Peripherally Inserted Central Catheter Line and arterial line
placements, chest drain, or peritoneal drain insertion etc.

I have been told by the doctors that while performing such procedures I will be informed and a separate consent for this procedure
shall be taken. However, in case of any life threatening emergency if the time is not available for taking informed consent it is
implied that I give consent for various invasive procedure to save the life of my child.

I understand that a sick child in Neonatal Intensive Care Unit has life threatening medical conditions.

I understand that when a child is sick in the Neonatal Intensive Care Unit with multiple medical and surgical procedures
performed upon him/her, there are inherent risks due to these high risk procedures, and high risk medications, in the form of
infections, bleeding, air leaks, skin and other tissue damage etc.

I give my consent to the team of doctors to go ahead and admit the child B/o Zeba Muskan
in the Neonatal Intensive Care Unit fully understanding the associated risk, benefits and alternatives involved from various
procedures, high risk medications and infections in the Neonatal Intensive Care Unit and treat him/her with all necessary means.

The doctors have explained to me in the language best understood to me.

It takes a lot to breast the best.

 **BirthRight**
BY RAINBOW HOSPITALS
Your Right to a Safe Delivery

రోగిగి పేరు వయస్సు లింగం పు ☐ స్త్రీ ☐

యు.పాచ్.ఐ.డి నేను బి

అనే బాలుడు / బాలిక యొక్క చికిత్స మేరకు రేయిన్స్ బిల్డ్ ఆసుపత్రి లోని నవజాత శిశువుల ఇంటెన్సివ్ కేర్ యూనిట్లో తేదీ

..... నాడు పూర్తి సమ్మతితో చేర్చితిని. మా బాలుడి / బాలికలో, ఈ క్రింద తెలిపిన ఆరోగ్య సమస్యల గురించి వైద్య నిపుణుడు నాకు అర్థమగు భాషలో వివరించితిరి.

నవజాత శిశువుల ఇంటెన్సివ్ కేర్ యూనిట్ లో మా పాప/బాబుకు వైద్య పరంగా అవసరమగు అన్ని రకాల చికిత్స విధానాలకు మరియు ప్రక్రియలను (ఉదా కత్తిమ శ్వాస వెంటిలేటర్, ధమని మార్గం, సింట్రిల్ లైన్ చెస్ట్ డ్రైయిన్, పెరిటోనియల్ డ్రైయిన్ ఇంనర్వన్ వంటి ప్రక్రియలను డాక్టరు గారు నాకు అర్థమగు భాషలో వివరించారు.

అటువంటి ప్రక్రియలు చేస్తున్నప్పుడు నాకు సమాచారం ఇవ్వబడుతుందని మరియు దీనికి ప్రత్యేక సమ్మతి ఉంటుందని వైద్యులు నాకు చెప్పారు. ఏదేమైనప్పటికీ, పైన తెలుపబడిన శస్త్ర ప్రక్రియలు చేసేముందు సమ్మతి తీసుకునే వీలు లేని చోట ఏదైనా ప్రాణాంతక అత్యవసర పరిస్థితులు ఏర్పడినప్పుడు మా బాలుడు / బాలికను కాపాడుటకు అవసరమైన వైద్య శస్త్ర ప్రక్రియలు మా సమ్మతి లేకుండానే చేయవచ్చని నేను సమ్మతిస్తున్నాను.

ఆరోగ్య సమస్యలతో బాధపడుతున్న మా బాలుడికి / బాలికకు రుగ్మతలచే ప్రాణహాని కలుగవచ్చిన నాకు వైద్యుడు అర్థమగు భాషలో వివరించితిరి

మా బాలుడు / బాలిక నవజాత శిశువు ఇంటెన్సివ్ కేర్ యూనిట్ లో ఉన్నప్పుడు ఎన్నో విధాల వైద్య మరియు శస్త్ర ప్రక్రియలు ఇంకా వివిధ చికిత్స విధానాలు అవసరం పడతాయని మరియు వాటివల్ల దుష్పరిణామాలు కలగవచ్చని అర్థం చేసుకున్నాను. ఆ పరిణామాలు ఎటువంటివి అనగా సన్నాలు మరియు అధిక ప్రమాదకరమైన మందుల రూపంలో అంటువ్యాధులు, రక్తస్రావం, శ్వాసపరమైన సమస్యలు, చర్మం మరియు ఇతర కణజాల నష్టం మొదలైనవి కలగవచ్చు.

మా బాలుడిని/బాలికను అడ్మిట్ చేయుటకు మరియు ఎన్. ఐ. సి. యు. లో ఉన్నప్పుడు జరుగు చికిత్స విధానాలు మరియు శస్త్ర ప్రక్రియలు వలన కలిగే అపాయాలను నేను అంగీకరిస్తున్నాను. మా పేషెంట్ ను తగిన విధంగా చికిత్స చేయడానికి వైద్యునికి నాపూర్తి అంగీకారం తెలియజేస్తున్నాను. వైద్యుడు నాకు అర్థమగు భాషలో అంతా వివరించారు.

మా బాలుడు / బాలిక ను ఇన్ టెన్సివ్ కేర్ యూనిట్ (ఎన్.ఐ.సి.య) లో చేర్చుకొని అవసరమయ్యే వైద్యం చేయుటకు నేను వైద్య బృందానికి నా సమ్మతి ధృవపరుస్తున్నాను.

CHILDREN'S OBSERVATION and EARLY WARNING SCORING TOOL

INSTRUCTIONS:

- The paediatric Early Warning Score i) seeks to identify the abnormal physiological finding seen during serious childhood illnesses and ii) offers a method to interpret such physiological derangements with clearly defined actions, ensuring that suitably experienced staff are involved with the care of the sickest children.
- The Early Warning Score does not replace clinical experience and acumen and should not be relied upon for such purpose.
- 6 clinical parameters are assessed and recorded as part of the child's routine clinical observation, providing a Early Warning Score between 0-6 (Higher Early Warning Score are seen in sicker children)
- Detailed actions are described according to increasing Early Warning Score.
- Some children with complex medical needs e.g. cyanotic heart disease may require modification to their trigger thresholds/ action plan- this should follow discussion with senior colleagues.
- Any Early Warning Score of 3 or above should be recorded below with details of any subsequent action initiated

Record Details when EARLY WARNING SCORE > 3			Record Time of Review and Plan		
Date	Time	Early Warning Score	Date	Time	Name

- If at any time additional help is required, call help – regardless of the Early Warning Score!
- Following a Early Warning Score assessment, senior help may be required

The SBAR communication tool (situation, background, assessment, recommendations) is a helpful mnemonic that can be used to describe a child's clinical condition to a colleague.

I	IDENTITY: I am (name), a nurse on ward (X). I am calling about (child X)
S	SITUATION : I am calling because I am concerned that ... (e.g. BP is low/high, pulse is XXX, Temperature is XX, Early Warning Score is XX)
B	BACK GROUND : Child (X) was admitted on (XX date) with (e.g. respiratory infection). They have had (X operation/ procedure/ investigation). Child (X)'s condition has changed in the last (XX mins). Their last set of observations were (XXX). The child's normal condition is ... (e.g. alert/ drowsy/ confused, pain free)
A	ASSESSMENT : I think the problem is (XXX) and I have ... (e.g. given O2/ analgesia, stopped the infusion), OR I am not sure what the problem is but child (X) is deteriorating, OR I don't know what's wrong but I am really worried.
R	RECOMMENDATION : I need you to ... come to see the child in the next (XX mins) AND I s there anything I need to do in the meantime ? (e.g. stop the fluid/ repeat observation)

* NB: If CCS is below 12 or the Oxygen requirement is $> 2 \text{ l/min}$, then irrespective of rest of the score, the Nurse MUST inform the PICU team

* NB: If GCS is below 12 or the Oxygen requirement is >3 Lit./min. , then irrespective of rest of the score, the Nurse MUST inform the PICU team.

ACTIONS NB: Scores 3 should be recorded overleaf	Score 1 : Continue normal observation by staff nurse
	Score 2 : Shift in charge nurse to be informed and continue hourly observations
	Score 3 : Shift in charge AND ER doctor/Floor Registrar to see and half hourly to hourly Observation to continue.
	Score 4 : Shift in charge AND treating consultant(till 8 PM) or On call night duty consultant to see
	Score 5 & 6 : Shift incharge and PICU /NICU fellow or PICU/NICU consultant to be informed

CHILDREN'S OBSERVATION and EARLY WARNING SCORING TOOL

INSTRUCTIONS:

- The paediatric Early Warning Score i) seeks to identify the abnormal physiological finding seen during serious childhood illnesses and ii) offers a method to interpret such physiological derangements with clearly defined actions, ensuring that suitably experienced staff are involved with the care of the sickest children.
- The Early Warning Score does not replace clinical experience and acumen and should not be relied upon for such purpose.
- 6 clinical parameters are assessed and recorded as part of the child's routine clinical observation, providing a Early Warning Score between 0-6 (Higher Early Warning Score are seen in sicker children)
- Detailed actions are described according to increasing Early Warning Score.
- Some children with complex medical needs e.g. cyanotic heart disease may require modification to their trigger thresholds/ action plan- this should follow discussion with senior colleagues.
- Any Early Warning Score of 3 or above should be recorded below with details of any subsequent action initiated

Record Details when EARLY WARNING SCORE > 3			Record Time of Review and Plan		
Date	Time	Early Warning Score	Date	Time	Name

- If at any time additional help is required, call help – regardless of the Early Warning Score!
- Following a Early Warning Score assessment, senior help may be required

The SBAR communication tool (situation, background, assessment, recommendations) is a helpful mnemonic that can be used to describe a child's clinical condition to a colleague.

I	IDENTITY: I am (name), a nurse on ward (X). I am calling about (child X)
S	SITUATION : I am calling because I am concerned that ... (e.g. BP is low/high, pulse is XXX, Temperature is XX, Early Warning Score is XX)
B	BACK GROUND : Child (X) was admitted on (XX date) with (e.g. respiratory infection). They have had (X operation/ procedure/ investigation). Child (X)'s condition has changed in the last (XX mins). Their last set of observations were (XXX). The child's normal condition is ... (e.g. alert/ drowsy/ confused, pain free)
A	ASSESSMENT : I think the problem is (XXX) and I have ... (e.g. given O2/ analgesia, stopped the infusion), OR I am not sure what the problem is but child (X) is deteriorating, OR I don't know what's wrong but I am really worried.
R	RECOMMENDATION : I need you to ... come to see the child in the next (XX mins) AND I s there anything I need to do in the meantime ? (e.g. stop the fluid/ repeat observation)

MEDICATION RECONCILIATION FORM

Drug Allergies: ner ☐ Not known any Drug Allergies

Medication Reconciliation will be done at the time of admission and also whenever there is change in the treating team or shifting from one unit to another unit.

(Example: at the time of admission shifting from ICU to Ward, or Ward to ICUs)

Shifting From: Shifted to:

S.No	MEDICATION NAME (GENERIC NAME CAPITAL LETTERS)	DOSE (mg, mcg)	ROUTE (PO, NG, SC, IV)	FREQUENCY	LAST DOSE Date / Time	ON ADMISSION / SHIFTING
1	LACTODEX HMF (1 Sachet in 25mg) SACHET	1 SACHET	P/O	Each feed.		☐ C ☐ DC
2	VITAMIN D DROPS	0.5ml	P/O	24 hrly.		☐ C ☐ DC
3	SYP. OSSICOPAN-D	2.5ml	P/O	8 hrly.		☐ C ☐ DC
4	PROTOGUARD- ONNMENT	1	U/A	8 hrly		☐ C ☐ DC
5	ZINCOVIT DROPS	0.5ml	P/O	24 hrly.		☐ C ☐ DC
6	ORAL CAFFEINE	1-8 m.	P/O	24 hrly		☐ C ☐ DC
7						☐ C ☐ DC
8						☐ C ☐ DC
9						☐ C ☐ DC
10						☐ C ☐ DC

* C - Continue, DC - Discontinue

MEDICATION HISTORY RECORDED / VERIFIED BY

Date & Time: 8/2/20 : 11:38 pm

Nurse Name & Signature: Naheswar

Date & Time: 8/7/26 @ 11:50 AM

DRUG CHART

Date of Admission: 22/6/22 Drug Allergies: ☒ Not known any Drug Allergies

FOR THE SAFETY OF THE PATIENT

- GENERAL** - Ensure that all patient details are entered above. ONLY A DOCTOR SHALL WRITE MEDICATION ORDERS.
- DOCTOR** - Please use only approved abbreviations (refer to Hospital's approved list of abbreviations).
 - Use approved pharmaceutical names, BLOCK LETTERS, metric dosage. English instructions.
 - Any changes in drug therapy must be ordered by a NEW PRESCRIPTION. Do not alter existing instructions.
 - Discontinue a drug by drawing a line **I** through it and a similar line through subsequent recording panels.
 - The date and time of stopping the drug along with the doctors name and sign must be mentioned.
 - Only one chart should be in use at any one time. When the chart is full, a new supplement can be kept within this drug sheet folder.
- NURSES** - Nurses must follow strictly the FIVE RIGHTS before administration of medication.
 1) Right Patient 2) Right Drug 3) Right Dosage 4) Right Route 5) Right Time
 - AVOID TAKING VERBAL ORDERS. NO VERBAL ORDERS FOR HIGH RISK/HIGH ALERT MEDICINES
 (EXCEPT FIRST DOSE OF EPINEPHRINE DURING CPR). Follow Hospitals's Verbal Order Policy.
