RISK ASSESSMENT FOR VENOUS THROMBOEMBOLISM (VTE)

- ✓ If total score ≥ 4 antenatally, consider thromboprophylaxis from the first trimester.
- ✓ If total score 3 antenatally, consider thromboprophylaxis from 28 weeks.
- ✓ If total score ≥ 2 postnatally, consider thromboprophylaxis for at least 10 days.
- ✓ If admitted to hospital antenatally consider thromboprophylaxis.
- ✓ If prolonged admission (≥3 days) or readmission to hospital within the puerperium consider thromboprophylaxis.

For patient with an identified bleeding risk, the balance of risks of bleeding and thrombosis should be discussed in consultation with a haematologist with expertise in thrombosis and bleeding in pregnancy.

I ..... Ms. R. INBASHREE ..... hereby give my consent for whole blood transfusion / blood components as part of treatment of myself / my patient while being admitted at Rainbow Hospital. I have been explained all the known risks of transfusion reactions. I have also been explained that the donor blood has been screened for HIV antibodies, Hepatitis B surface antigens, Hepatitis C antibodies, Malaria and Syphilla. I have also been explained that transfusion transmitted infections can vary rarely occur even with screened blood, especially if it is in the "window period" and also due to various other infections which have not been screened for. I also understand that any blood component transfusions carry risk of transfusion associated reactions.

All the above-mentioned risks have been explained to me by the doctor treating me / my patient in the language that I fully understand and I accept the same and give my consent for the whole blood component transfusion to me / my Patient named ..... Ms. R. INBASHREE .....
