GENERAL CONSENT FOR TREATMENT

Patient Name:	**Ms MAIRA**	**Age :**	**8 Y 10 M 12 D**
IP No:	**IP18-00036676**	**Sex:**	**Female**
Consultant:	**Dr. KUMAR M**	**Ward/Bed No:**	**5F-SEMI PRIVATE/SPVT 512**

The undersigned patient and I or responsible relative or person hereby consent to and authorize Rainbow Hospitals doctors and medical personnel to perform medical examinations, conduct routine investigations and administer medical treatments, outpatient procedures, minor dressings, vaccinations and immunizations during the course of the patient's care, as in patient.

Patient, be deemed advisable or necessary.

I understand that the confidentiality of all medical records shall be protected to the full extent of the Law. The undersigned also consent to the use of health related information/ audiovisuals of the patient for research & training purpose or for [illegible]urance coverage and while doing so confidentiality of the patient will be maintained at all times and this will not affect the care of the patient.

In giving my general consent to treatment, I understand that I retain the right to refuse any particular examinations, test, procedure, treatment, therapy or medication recommended or deemed medically necessary by treating doctors. I also understand that the practice of medicine is not an exact science and that no guarantee have been made to me as the results of my evaluation and I or treatment.

I understand that I shall not bring valuables to the Hospitals and that the Hospital will not be responsible for the loss, destruction or theft of my personal belongings. I assume full responsibility for all my personal items and release the Hospital from responsibility and liability for such personal items and valuables.

"I am aware that during the patient care it is inevitable that certain re-useable equipment shall be re-used after sterilization and disinfection. I am informed that the hospital assures maximum level of precaution and care in sterilizing and disinfecting the equipment and monitors the whole process as per evidence based guidelines".

Note:
1 We do not allow use of medication brought from outside by the patient.
2 I have received attendant passes as per my room category. I understand that I have to return it back at the time of final bill clearance. In case of failing the submission, I will pay 200/- Rs.
(Receivers Signature:✓.....)

3 IP Guide book has been given to me and I have been explained about the Hospitals rules and policies.
4 Financial and billing counseling has been done to me.

DRUG CHART

Date of Admission: 29/8 Drug Allergies: ← ☐ Not known any Drug Allergies

FOR THE SAFETY OF THE PATIENT

GENERAL - Ensure that all patient details are entered above. ONLY A DOCTOR SHALL WRITE MEDICATION ORDERS.

DOCTOR - Please use only approved abbreviations (refer to Hospital's approved list of abbreviations).
- Use approved pharmaceutical names, BLOCK LETTERS, metric dosage. English instructions.
- Any changes in drug therapy must be ordered by a NEW PRESCRIPTION. Do not alter existing instructions.
- Discontinue a drug by drawing a line I through it and a similar line through subsequent recording panels.
- The date and time of stopping the drug along with the doctors name and sign must be mentioned.
- Only one chart should be in use at any one time. When the chart is full, a new supplement can be kept within this drug sheet folder.

NURSES - Nurses must follow strictly the FIVE RIGHTS before administration of medication.
1) Right Patient 2) Right Drug 3) Right Dosage 4) Right Route 5) Right Time
- AVOID TAKING VERBAL ORDERS. NO VERBAL ORDERS FOR HIGH RISK/HIGH ALERT MEDICINES (EXCEPT FIRST DOSE OF EPINEPHRINE DURING CPR). Follow Hospitals's Verbal Order Policy.

CHILDREN'S OBSERVATION and EARLY WARNING SCORING TOOL

INSTRUCTIONS:

- The paediatric Early Warning Score i) seeks to identify the abnormal physiological finding seen during serious childhood illnesses and ii) offers a method to interpret such physiological derangements with clearly defined actions, ensuring that suitably experienced staff are involved with the care of the sickest children.
- The Early Warning Score does not replace clinical experience and acumen and should not be relied upon for such purpose.
- 6 clinical parameters are assessed and recorded as part of the child's routine clinical observation, providing a Early Warning Score between 0-6 (Higher Early Warning Score are seen in sicker children)
- Detailed actions are described according to increasing Early Warning Score.
- Some children with complex medical needs e.g. cyanotic heart disease may require modification to their trigger thresholds/ action plan- this should follow discussion with senior colleagues.
- Any Early Warning Score of 3 or above should be recorded below with details of any subsequent action initiated

Record Details when EARLY WARNING SCORE >3			**Record Time of Review and Plan**		
Date	Time	Early Warning Score	Date	Time	Name

- If at any time additional help is required, call help – regardless of the Early Warning Score!
- Following a Early Warning Score assessment, senior help may be required

The SBAR communication tool (situation, background, assessment, recommendations) is a helpful mnemonic that can be used to describe a child's clinical condition to a colleague.

I	**IDENTITY:** I am (name), a nurse on ward (X). I am calling about (child X)
S	**SITUATION :** I am calling because I am concerned that ... (e.g. BP is low/high, pulse is XXX, Temperature is XX, Early Warning Score is XX)
B	**BACK GROUND :** Child (X) was admitted on (XX date) with (e.g. respiratory infection). They have had (X operation/ procedure/ investigation). Child (X)'s condition has changed in the last (XX mins). Their last set of observations were (XXX). The child's normal condition is ... (e.g. alert/ drowsy/ confused, pain free)
A	**ASSESSMENT :** I think the problem is (XXX) and I have ...(e.g. given O2/ analgesia, stopped the infusion), OR I am not sure what the problem is but child (X) is deteriorating, OR I don't know what's wrong but I am really worried.
R	**RECOMMENDATION :** I need you to ... come to see the child in the next (XX mins) AND I s there anything I need to do in the meantime ? (e.g. stop the fluid/ repeat observation)

BRADEN 'Q' SCALE

Rainbow Children's Hospital
It takes a lot to treat the little

BirthRight BY RAINBOW HOSPITALS
Your Right to a Safe Delivery

					Date :	N 29/7	M 30/7	E 30/7	N 30/7
					Time :				
Mobility	**1. Completely immobile:** Does not make even slight changes in body or extremity position without assistance.	**2. Very limited:** Makes occasional slight changes in body or extremity position but unable to completely turn self independently.	**3. Slightly limited:** Makes frequent through slight changes in body or extremity position independently.	**4. No limitations:** Makes major and frequent changes in position without assistance.		4	4	4	4
"Activity The degree of physical activity"	**1. Bedfast :** Confined to bed	**2. Chairfast :** Ability to walk severely limited or non-existent. Cannot bear own weight and/or must be assisted into chair or wheelchair."	**3. Walks occasionally:** Walks occasionally during day, but for very short distances, with or without assistance. Spends majority of each shift in bed or chair.	**4. All patients too young to ambulate; OR walks frequently:** Walks outside the room at least twice a day and inside room at least once every 2 hours during walking hours.		4	4	4	4
Sensory Perception	**1. Completely limited:** Unresponsive (does not moan, flinch or grasp) to painful stimuli due to diminished level of consciousness or sedation, OR, limited ability to feel pain over most of the body surface.	**2. Very limited:** responds to only painful stimuli, cannot communicate discomfort except by moaning or restlessness; OR, has sensory impairment that limits the ability to feel pain or discomfort over half of body.	**3. Slightly limited:** Responds to verbal commands, but cannot always communicate discomfort or need to be turned; OR, has some sensory impairment that limits ability to feel pain, or discomfort in one or two extremities.	**4. No impairment:** Responds to verbal commands. Has no sensory deficit that would limit ability to feel or communicate pain or discomfort.		4	4	4	4
Moisture Degree to which skin is exposed to moisture	**1. Constantly moist:** Skin is kept moist almost constantly by perspiration, urine, drainage, etc. Dampness is detected every time patient is moved or turned.	**2. Very moist:** Skin is often, but not always, moist. Linen must be changed at least every 8 hours.	**3. Occasionally moist:** Skin is occasionally moist, requiring linen change every 12 hours.	**4. Rarely moist:** Skin is usually dry, routine diaper changes; linen only requires changing every 24 hours.		4	4	4	4
FRICTION-SHEAR **Friction** Occurs when Skin moves against support surfaces **Shear** Occurs when skin and adjacent bony surface slide across one another	**1. Significant problem:** Spasticity, contracture, itching, or agitation leads to almost constant thrashing and friction.	**2. Problem:** Requires moderate to maximum assistance in moving. Complete lifting without sliding against sheets is impossible. Frequently slides down in bed or chair, requiring frequent repositioning with maximum assistance.	**3. Potential problem:** Moves freely or requires minimum assistance. During a move, skin probably slides to some extent against sheets, chair, restraints, or other devices. Maintains relative good position in chair or bed most of the time but occasionally slides down.	**4. No apparent problem:** Able to completely lift patient during position change, moves in bed and in chair independently and has sufficient muscle strength to life up completely during move. Maintains good position in bed or chair at all times."		4	4	4	4
Nutritional Usual food intake pattern	**1. Very Poor:** NPO/or maintained on clear liquids, or IVs for more than 5 days OR albumin < 2.5 mg/dl OR never eats a complete meal. Rarely eats more than half of any food offered. Protein intake includes only 2 servings or meat or dairy products per day. Takes fluids poorly. Does not take a liquid dietary supplement.	**2. Inadequate:** Is on liquid diet or tube feedings/TPN, which provides inadequate calories and minerals for age OR albumin < 3 mg/dl OR rarely eats a complete meal and generally eats only about half of any food offered. Protein intake includes only 3 servings of meat or dairy products per day. Occasionally will take a dietary supplement.	**3. Adequate:** Is on tube feedings or TPN, which provide adequate calories and minerals for age OR eats over half of most meals. Eats a total of 4 servings of protein (meat, dairy products) each day. Occasionally will refuse a meal, but will usually take a supplement if offered.	**4. Excellent:** Is on a normal diet providing adequate calories for age. For example, eats most of every meal. Never refuses a meal. Usually eats a total of 4 or more servings of mean and dairy products. Occasionally eats between meals. Does not require supplementation.		3	3	3	3
Tissue Perfusion & Oxygenation	1. Extremely compromised: Hypotensive (MAP < 50 mm Hg; < 40 in a newborn) or the patient does not physiologically tolerate position changes.	2. Compromised: Normotensive oxygen saturation may be < 95%; hemoglobin may be < 10 mg/dl; capillary refill may be > 2 seconds; serum pH is < 7.40.	3. Adequate: Normotensive oxygen saturation may be < 95%; hemoglobin may be < 10 mg/dl; capillary refill may be 2 seconds; serum pH is normal.	4. Excellent: Normotensive, oxygen saturation > 95%; normal hgb; capillary refill < 2 seconds.		4	4	4	4
					TOTAL SCORE	27	27	27	28
					Evaluator's Name

Circulation / Colour
☑ Normal ☐ Abnormal ☐ Bleeding

Work of Breathing
☑ Normal ☐ Increased
☐ Decreased ☐ Gasping / Apnea

INITIAL PHYSIOLOGICAL STATUS
☑ Stable
☐ Unstable :
- ☐ Not – Life - Threatening
- ☐ Life – Threatening

Triage Classification	CTAS
☐ Level 1 : Resuscitation	☐ Immediate
☐ Level 2 : EMERGENT : Life or limb threatening	☐ < 15 min
☐ Level 3 : URGENT : Significant illness / injury with potential to become life or limb threatening	☐ 30 min
☐ Level 4 : LESS URGENT : Significant illness but not life threatening	☐ 60 min
☐ Level 5 : NON – URGENT : May receive care when convenient	☑ 120 min

NOTE : All immunocompromised children and preterm babies to be considered Level 2.
All Children less than 2 years age with high fever to be considered Level 3.

✓ Signature of Parent / Guardian

* CTAS - Canadian Triage and Acuity Scale

Triage Completion Time : 2 min

Communicable Disease Triage Screening

PART A. The following questions should be asked to all patients at the initial screening:

1. Have you had fever (elevated temperature) in the past 2 weeks ☐ Yes ☑ No
2. Have you had cough or a rash in the past 2 weeks ☐ Yes ☑ No
3. Have you had shortness of breath or difficulty breathing in the past 2 weeks ☐ Yes ☑ No

PART B. For patients reporting fever and respiratory/rash symptoms: ☐ Not applicable

1. Have you travelled outside the INDIA? or had close contact with someone who has recently travelled outside the INDIA, in the past two weeks? ☐ Yes ☑ No
   If yes, State Location:
2. Are your parents / close contacts at home is/a healthcare worker? {please encircle the choices} (e.g., nurse, physician, ancillary services personnel, allied health services personnel, hospital volunteer, or laboratory worker, others) who has had a recent exposure to an individual with a highly communicable disease or unexplained, severe febrile respiratory or rash disease? ☐ Yes ☑ No

PART C. A positive communicable disease triage screening is considered for any patient who meets one of the two following criteria:

- ☐ Any patient with Fever / Rash / Vesicles / Discharge from Eyes and Cough
- ☐ Any patient with fever and respiratory symptoms who answered "YES" to any of the questions on epidemiologic risk factors in "PART B" of the triage screening above.

PART D. ACTION / INTERVENTION: (for positive suspected communicable disease triage screening)

- ☐ Patients should be immediately isolated in a negative pressure room or a single room (as appropriate) for pending evaluation.
- ☐ The patient should be given a surgical mask immediately, if not already wearing one.
- ☐ Both patient and triage staff should perform hand hygiene.
- ☐ The staff should use PPE (as appropriate).
