GENERAL CONSENT FOR TREATMENT

Patient Name:	**Mrs JEFFY JONE**		
IP No:	**IP18-00036700**	**Age :**	**30 Y 1 M 11 D**
Consultant:	**Dr. PRIYADHARSHINI S M**	**Sex:**	**Female**
		Ward/Bed No:	**7F-PVT/SUITE/PVT 701**

The undersigned patient and I or responsible relative or person hereby consent to and authorize Rainbow Hospitals doctors and medical personnel to perform medical examinations, conduct routine investigations and administer medical treatments, outpatient procedures, minor dressings, vaccinations and immunizations during the course of the patient's care, as in patient.

Patient, be deemed advisable or necessary.

I understand that the confidentiality of all medical records shall be protected to the full extent of the Law. The undersigned also consent to the use of health related information/ audiovisuals of the patient for research & training purpose or for insurance coverage and while doing so confidentiality of the patient will be maintained at all times and this will not affect the c[illegible] of the patient.

In giving my general consent to treatment, I understand that I retain the right to refuse any particular examinations, test, procedure, treatment, therapy or medication recommended or deemed medically necessary by treating doctors. I also understand that the practice of medicine is not an exact science and that no guarantee have been made to me as the results of my evaluation and I or treatment.

I understand that I shall not bring valuables to the Hospitals and that the Hospital will not be responsible for the loss, destruction or theft of my personal belongings. I assume full responsibility for all my personal items and release the Hospital from responsibility and liability for such personal items and valuables.

"I am aware that during the patient care it is inevitable that certain re-useable equipment shall be re-used after sterilization and disinfection. I am informed that the hospital assures maximum level of precaution and care in sterilizing and disinfecting the equipment and monitors the whole process as per evidence based guidelines".

Note:
1 We do not allow use of medication brought from outside by the patient.
2 I have received attendant passes as per my room category. I understand that I have to return it back at the time of final bill clearance. In case of failing the submission, I will pay 200/- Rs.
(Receivers Signature:.....)

3 IP Guide book has been given to me and I have been explained about the Hospitals rules and policies.
4 Financial and billing counseling has been done to me.

BILLING POLICY

- Billing Cycle: - Bed charges will be calculated based on 12PM to 12PM checkout. Settlement post 12PM, room rent will be charged for half day extra & post 6PM, it will be charged for full day. Less than 24 hours stay will be considered as one day.
- Room Rent inclusive of Bed, Nursing, Consultation Charges and all other charges, like Diet, Investigations, IP or OP Procedures, Equipment, Cross Consultations, Blood/ Blood Products, Implants, Ward Consumables, Infection Preventive Measure Charges, Pharmacy and Consumables will be charged extra.
- 5% GST Charges applicable on more than INR 5,000/- Bed Charges which was effective from 18.07.2022 as per the GST Council.
- As per the G.O.I. guidelines, we can collect Rs 1,99,999/- only in cash mode, balance patient can pay through Credit Card/ Debit Card/ NEFT / RTGS / Demand Draft and Online Payment.
- In the event of TPA / Cashless denial or approval not received due to any reason then hospital tariff will be applicable and any discount or special rates given to TPA's / Corporate won't 9eapplicable.
- If the Surgery/ Procedures performed in emergency hours (8PM-6AM), Public Holiday and on Sunday will be charged 30% extra.
- Asst. Surgeon and Anesthetist Charges will be charged 30% on the Surgeon Charges.
- Admission will be done according to the ward category chosen by the patient; charges will be applicable as per the ward category. All charges vary as per Room category, except Pharmacy and consumables.
- Patient / Guardian Self Attested Government ID proof is mandatory to submit at the admission.
- TPA/Insurance Processing Fee applicable for all Insurance Cases.
- In our hospital there is "No Discounts Policy". Kindly co-operate.
- No Duplicate/ Second copy of OP or IP bill will be issued.
- In case the patient is shifted from lower category to higher category, all the charges like consultant visits, investigations, operations and procedures etc. from the date of admission will be charged according to the higher category.
- If the patient is shifted to the ICU, the attendant should vacate the room. If the attender occupies the room, it will be charged as per dual occupancy.
- Room eligibility is purely subject to TPA approval. Proportionate difference of the bill amount is applicable in case the patient opts for higher category higher than the TPA approved, which has to paid by the patient and may not be reimbursed by the TPA / Insurance Company at later stage.
- For Non - Medicals, Disposables, Consumables, Infusion Pump, Taxes, Implants, HIV/ HbsAg, Medical Records, Insurance Processing Fee, Double Occupancy and Registration Charges, Etc., credit cannot be extended. These items are not payable to us as per insurance company norms (Depends on the TPA/Insurance Co. T&C).
- It takes time for cash discharge is a minimum 3-4hrs. and in the case of insurance, it will take a minimum 6-7hrs.
- Difference, if any between the final bill amount arid amount permitted / approved by the TPA or total bill amount in case of denial from TPA, has to be paid by the patient.
- Two attendants are permitted with patients in Deluxe, Private Rooms and only one is permitted in the rest of the categories of rooms. No attendant is permitted in ICU's.
- All the refunds more than Rs.5,000/- will be refunded through NEFT within 7 Bank working days.
- Patient attendant can collect for Interim/provisional bill of the patient from the billing section on daily basis. Interim Bill shall be based on the acknowledged services in HIS. Final Bill of the patient may vary from the Interim bill based on actual update taken on the day of discharge. It is requested that patients/attendants enquire daily about the bill amount from billing section and pay the outstanding as on that day. You are requested to clear your outstanding amount on daily basis before 12 PM. **Patient bill outstanding should**
- **not be increase more than 10,000/-**

DECLARATION

I have attended the Financial Counselling desk & understood the expected costs & other conditions applicable. In this case, the TPA/Insurance Company rejects the claim for whatsoever reasons at any point of time after discharge. I promise to settle the claim with the hospital as per Hospital Cash Tariff.

01/08/2026 5.40 AM	C/S/B Dr. Priyadharshini / C/S/B Dr. Pavithra.	
	Pt reviewed.	
	o/e	Advice
	P/v- Cx well effaced	- Active pushing.
	os fully dilated	- Wtf contractions
G1P1 Occasional Fourth Degree ®	membs ⊖	- Inj Cupacef 1.5g IV stat (A?D)
	Vx @ +1 station	
01/08/2026 5.46 AM.	Vacuum Assisted Vaginal Delivery with Right Mediolateral Episiotomy.	Ind- Narrow Subpubic arch.
	C/B- Dr. Priyadharshini.	
	A/B- Dr. Pavithra	
	↓ SPR, patient in dorsal lithotomy position, local parts painted and draped. With good uterine contraction, full cervical dilatation and good maternal efforts, due to narrow pubic space decision made to apply vacuum cup. 2% lignocaine infiltrated into perineum. ® mediolateral episiotomy was given. Vacuum cup applied at vertex and baby head delivered by extension. followed by body. Cord clamped and cut. Baby handed over to paediatrician. Inj Carbetocin 100mcg in 100ml NS IV given. Episiotomy wound sutured in layers with Rapid vicryl.	
	P/A - Uterus firm & cont well.	
	P/V - NO undue bleeding P/V.	
	P/R - Rectal mucosa free & intact.

DRUG CHART

Date of Admission: 3/7/26 Drug Allergies: ..... ☐ Not known any Drug Allergies

FOR THE SAFETY OF THE PATIENT

GENERAL - Ensure that all patient details are entered above. ONLY A DOCTOR SHALL WRITE MEDICATION ORDERS.

DOCTOR - Please use only approved abbreviations (refer to Hospital's approved list of abbreviations).
- Use approved pharmaceutical names, BLOCK LETTERS, metric dosage. English instructions.
- Any changes in drug therapy must be ordered by a NEW PRESCRIPTION. Do not alter existing instructions.
- Discontinue a drug by drawing a line *I* through it and a similar line through subsequent recording panels.
- The date and time of stopping the drug along with the doctors name and sign must be mentioned.
- Only one chart should be in use at any one time. When the chart is full, a new supplement can be kept within this drug sheet folder.

NURSES - Nurses must follow strictly the FIVE RIGHTS before administration of medication.
1) Right Patient 2) Right Drug 3) Right Dosage 4) Right Route 5) Right Time
- AVOID TAKING VERBAL ORDERS. NO VERBAL ORDERS FOR HIGH RISK/HIGH ALERT MEDICINES (EXCEPT FIRST DOSE OF EPINEPHRINE DURING CPR). Follow Hospitals's Verbal Order Policy.

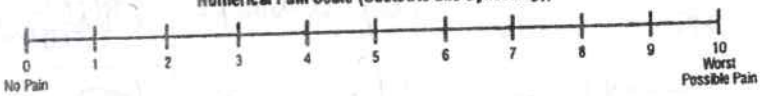
Re-assessment Frequency:
1. Every eight hours for all hospitalized patients.
2. For post-surgical patients, patients with chronic pain, patient with severe pain:
   a) At least every 2 hours for the first 24 hours
   b) Then every 4 hours.
   c) Prior to pain pain-relieving intervention.
   d) Within 30 – 60 minutes after pain relief intervention.

(P.T.O)

PAIN ASSESSMENT TOOLS

Numerical Pain Scale (Obstetric and Gynecology)



Wong - Baker (Pediatrics) Above 7 Years

FLACC PAIN ASSESSMENT SCALE (1 Month to 7 Years)

CATEGORY	SCORING		
	0	1	2
Face	No Particular expression or smile	Occasional Grimace or Frown, withdraw, Disoriented	Frequent to constant frown, quivering chin, clenched jaw
Legs	Normal Position or Relaxed	Uneasy, restless, tense	Kicking, or legs drawn up
Activity	Laying quietly normal position, moves easily	Squirming shifting back and forth, tense	Arched, right, or Jerking
Cry	No Cry (Awake or asleep)	Moans or whimpers occasional complaint	Crying steadily, screams of sobs, frequent complaints
Consolability	Content, relaxed	Reassured by occasional touching, hugging, or being talked to, distractible	Difficult to console or comfort

Neonatal Pain, Agitation and Sedation Scale (upto 1 Month)

Assessment Criteria	Sedation		Normal	Pain / Agitation	
	-2	-1	0	1	2
Crying Irritability	No Cry with painful stimuli	Moans or cries minimally with painful stimuli	Appropriate crying Not irritable	Irritable or crying at intervals consolable	High-pitched or silent-continuous cry Inconsolable
Behavior State	No arousal to any stimuli No spontaneous movement	Arouses minimally to stimuli Little spontaneous movement	Appropriate for gestational age	Restless, squirming Awakens frequently	Arching, kicking constantly awake or Arouses minimally / no movement (not sedated)
Facial Expression	Mouth is lax No expression	Minimal expression with stimuli	Relaxed Appropriate	Any pain expression Intermittent	Any pain expression continual
Extremities Tone	No grasp reflex Flaccid tone	Weak grasp reflex decreased muscle tone	Relaxed hands and feet Normal Tone	Intermittent clenched toes, fists or finger splay Body is not tense	Continual clenched toes, fists, or finger splay Body is tense
Vital Signs HR RR, BP, SaO_2	No variability with stimuli Hypoventilation or apnea	Less than 10% variability from baseline with stimuli	Within baseline or normal for gestational age	Increase 10-20% from baseline SaO_2 76-85% with stimulation - quick recovery	Increase greater than 20% from baseline, SaO_2 less than or equal to 75% with stimulation - slow recovery Out of sync or fighting ventilator

BRADEN 'Q' SCALE

Rainbow Children's Hospital
It takes a lot to treat the little

BirthRight
BY RAINBOW HOSPITALS
Your Right to a Safe Delivery

					Date : 31/7 31/2 3/8/26 1/8/26
					Time : 4pm 8pm 8am 2pm
Mobility	**1. Completely immobile:** Does not make even slight changes in body or extremity position without assistance.	**2. Very limited:** Makes occasional slight changes in body or extremity position but unable to completely turn self independently.	**3. Slightly limited:** Makes frequent through slight changes in body or extremity position independently.	**4. No limitations:** Makes major and frequent changes in position without assistance.	4 4 4 4
"Activity The degree of physical activity"	**1. Bedfast :** Confined to bed	**2. Chairfast :** Ability to walk severely limited or non-existent. Cannot bear own weight and/or must be assisted into chair or wheelchair."	**3. Walks occasionally:** Walks occasionally during day, but for very short distances, with or without assistance. Spends majority of each shift in bed or chair.	**4. All patients too young to ambulate; OR walks frequently:** Walks outside the room at least twice a day and inside room at least once every 2 hours during walking hours.	3 3 3 3
Sensory Perception	**1. Completely limited:** Unresponsive (does not moan, flinch or grasp) to painful stimuli due to diminished level of consciousness or sedation, OR, limited ability to feel pain over most of the body surface.	**2. Very limited:** responds to only painful stimuli, cannot communicate discomfort except by moaning or restlessness; OR, has sensory impairment that limits the ability to feel pain or discomfort over half of body.	**3. Slightly limited:** Responds to verbal commands, but cannot always communicate discomfort or need to be turned; OR, has some sensory impairment that limits ability to feel pain, or discomfort in one or two extremities.	**4. No impairment:** Responds to verbal commands. Has no sensory deficit that would limit ability to feel or communicate pain or discomfort.	4 4 4 4
Moisture Degree to which skin is exposed to moisture	**1. Constantly moist:** Skin is kept moist almost constantly by perspiration, urine, drainage, etc. Dampness is detected every time patient is moved or turned.	**2. Very moist:** Skin is often, but not always, moist. Linan must be changed at least every 8 hours.	**3. Occasionally moist:** Skin is occasionally moist, requiring linen change every 12 hours.	**4. Rarely moist:** Skin is usually dry, routine diaper changes; linen only requires changing every 24 hours.	4 4 4 4
FRICTION-SHEAR **Friction** . Occurs when Skin moves against support surfaces **Shear** Occurs when skin and adjacent bony surface slide across one another	**1. Significant problem:** Spasticity, contracture, itching, or agitation leads to almost constant thrashing and friction.	**2. Problem:** Requires moderate to maximum assistance in moving. Complete lifting without sliding against sheets is impossible. Frequently slides down in bed or chair, requiring frequent repositioning with maximum assistance.	**3. Potential problem:** Moves freely or requires minimum assistance. During a move, skin probably slides to some extent against sheets, chair, restraints, or other devices. Maintains relative good position in chair or bed most of the time but occasionally slides down.	**4. No apparent problem:** Able to completely lift patient during position change, moves in bed and in chair independently and has sufficient muscle strength to life up completely during move. Maintains good position in bed or chair at all times."	4 4 4 4
Nutritional Usual food intake pattern	**1. Very Poor:** NPO/or maintained on clear liquids, or IVs for more than 5 days OR albumin < 2.5 mg/dl OR never eats a complete meal. Rarely eats more than half of any food offered. Protein intake includes only 2 servings or meat or dairy products per day. Takes fluids poorly. Does not take a liquid dietary supplement.	**2. Inadequate:** Is on liquid diet or tube feedings/TPN, which provides inadequate calories and minerals for age OR albumin < 3 mg/dl OR rarely eats a complete meal and generally eats only about half of any food offered. Protein intake includes only 3 servings of meat or dairy products per day. Occasionally will take a dietary supplement.	**3. Adequate:** Is on tube feedings or TPN, which provide adequate calories and minerals for age OR eats over half of most meals. Eats a total of 4 servings of protein (meat, dairy products) each day. Occasionally will refuse a meal, but will usually take a supplement if offered.	**4. Excellent:** Is on a normal diet providing adequate calories for age. For example, eats most of every meal. Never refuses a meal. Usually eats a total of 4 or more servings of mean and dairy products. Occasionally eats between meals. Does not require supplementation.	4 4 4 4
Tissue Perfusion & Oxygenation	**1. Extremely compromised:** Hypotensive (MAP < 50 mm Hg; < 40 in a newborn) or the patient does not physiologicaily tolerate position changes.	**2. Compromised:** Normotensive oxygen saturation may be < 95%; hemoglobin may be < 10 mg/dl; capillary refill may be > 2 seconds; serum pH is < 7.40.	3. Adequate: Normotensive oxygen saturation may be < 95%; hemoglobin may be < 10 mg/dl; capillary refill may be 2 seconds; serum pH is normal.	4. Excellent: Normotensive, oxygen saturation > 95%; normal hgb; capillary refill < 2 seconds.	4 4 4 4

Fall Risk Grading		
Risk Level	**Morse Fall Score (MFS)**	**Action**
Low Risk	0 - 24	Standard Fall Precaution
Moderate Risk	25 - 50	Implement Moderate Fall Prevention Intervention
High Risk	≥ 51	Implement High Risk Fall Prevention Intervention

Tick (✓) whichever precaution taken.

Risk Level and Interventions

Low Risk (0 – 24) (Standard Falls Precautions)

- ☐ Ensure patients use their prescribed eye glasses if any, in the hospital
- ☐ Use chairs with arm rests
- ☐ Use safety straps on stretchers and wheelchairs while transporting patients

Moderate Risk (25-50) Apply all low risk intervention and

- ☐ Assist and/or supervise ambulation. Reinforce to always call for assistance
- ☐ Hourly safety check
- ☐ Assess patient after visitors, leave to ensure safety measures in place

High Risk (≥ 51) Apply all low and moderate risk interventions, and.

- ☐ Initiate constant observation by healthcare provider as appropriate to patient's needs

RISK ASSESSMENT TOOL FOR DEEP VEIN THROMBOSIS

POSTNATAL ASSESSMENT AND MANAGEMENT (TO BE ASSESSED ON DELIVERY SUITE)

Date: 31/7/26

Pre - Existing Risk Factors	Tick	Score
Previous VTE (except a single event related to major surgery)		4
Previous VTE provoked by major surgery		3
Known high-risk thrombophilia		3
Medical comorbidities e.g. cancer, heart failure; active systemic lupus erythematosus, inflammatory polyarthropathy or inflammatory bowel disease; nephrotic syndrome; type I diabetes mellitus with nephropathy; sickle cell disease; current intravenous drug user		3
Family history of unprovoked or estrogen-related VTE in first-degree relative		1
Known low-risk thrombophilia (no VTE)		1
Age (≥35 years)		1
Obesity		1
Parity ≥ 3	✓	1 or 2
Smoker		1
Gross varicose veins		1
Obstetric Risk Factors		
Pre-eclampsia in current pregnancy		1
ART/IVF (antenatal only)		1
Multiple pregnancy		1
Caesarean section in labour		2
Elective caesarean section		1
Mid-cavity or rotational operative delivery		1
Prolonged labour (24 hours)		1
PPH (1 litre or transfusion)		1
Preterm birth 37^{+0} weeks in current pregnancy		1
Stillbirth in current pregnancy		1
Transient Risk Factors		
Any surgical procedure in pregnancy or puerperium except immediate repair of the perineum, e.g. appendectomy, postpartum sterilization		3
Hyperemesis		3
OHSS (first trimester only)		4
Current systemic infection		1
Immobility, dehydration		1
Total		1
Signature of the Nurse	S/M Mccarley 0150	
Action Plan		

RISK ASSESSMENT FOR VENOUS THROMBOEMBOLISM (VTE)

- ✓ If total score ≥ 4 antenatally, consider thromboprophylaxis from the first trimester.
- ✓ If total score 3 antenatally, consider thromboprophylaxis from 28 weeks.
- ✓ If total score ≥ 2 postnatally, consider thromboprophylaxis for at least 10 days.
- ✓ If admitted to hospital antenatally consider thromboprophylaxis.
- ✓ If prolonged admission (≥3 days) or readmission to hospital within the puerperium consider thromboprophylaxis.

For patient with an identified bleeding risk, the balance of risks of bleeding and thrombosis should be discussed in consultation with a haematologist with expertise in thrombosis and bleeding in pregnancy.

INFORMED CONSENT FOR VAGINAL BIRTH

Rainbow® Children's Hospital
It takes a lot to treat the little.

BirthRight™
BY RAINBOW HOSPITALS
Your Right to a Safe Delivery

GUC-00084304 IP18-00036700
Mrs JEFFY JONE
20-06-1996 30 Y 1 M 12 D (F)
Dr. PRIYADHARSHINI S M

UHID No : .....

Date : ..... Time : .....

I hereby authorized the performance of the following procedure:

- The Procedure has been explained to me in general terms and I understand that:
- The indication requiring the procedure of vaginal birth is pregnancy.
- The purpose of this procedure of vaginal birth pregnancy.
- The purpose of this procedure is to deliver the bay vaginally.

The outcome of the vaginal birth is the delivery of infant through birth canal either naturally or with possible use of force vacuum extraction. An episiotomy (a cut performed for enlarging of the vaginal opening in the space between the vaginal and the rectum) may be performed as part of a vaginal delivery.

Should vaginal delivery be unsuccessful, delivery by cesarean section with an abdominal incision under appropriate anesthesia may be necessary.

In an attempt to deliver the baby either naturally or with the help of instrument i.e. forceps or vacuum, there may be risks of: infection, allergic reaction, scarring, blood loss, need for blood transfusion, pain and discomfort, injury to urinary tract, possible injury to the baby (laceration, hematoma, skull fracture, nerve injury and brain injury) and possible future pelvic floor dysfunction.,

I understand and accept that there are complications, benefits, alternatives including the remote risk of death or serious disability, which exists for me and my baby.

I am aware that in most cases, vaginal delivery results in a healthy mother and baby; however, I realize that there are no guarantees.

I voluntarily consent to the procedures described or otherwise referred to herein. I am aware that they will be performed by a qualified gynecologist.

Name of the Doctor performing the procedure: Dr. Priyadharshini

INDUCTION OF LABOR CONSENT

GUC-00084304
IP18-00036700
Mrs JEFFY JONE
20-06-1996 30 Y 1 M 12 D (F)
Dr. PRIYADHARSHINI S M

Name: ..... Age: ..... Gender: Male ☐ Female ☐

UHID.No : ..... Date: .....

You are scheduled for an induction of labor on 31/07/2026 (date) at 39 weeks + 1 day (weeks of gestation).

The reason for your induction is Term

The goal of induction of labor is to achieve vaginal delivery by starting uterine contractions before the spontaneous start of labor.

Induction of labor for a medical indication is done when continuation of pregnancy is considered detrimental to the health of the mother or fetus. This can be done at any stage of pregnancy irrespective of fetal maturity if there is a valid indication.

Elective induction of labor (scheduled induction without a medical indication) may not be done until you are at least 39 weeks. This is important so that your newborn does not have complications due to possible prematurity.

The alternative to induction of labor is to wait for labor to start spontaneously.

I have read the information provided and also discussed the process with my doctor.

I understand the risks and benefits of this procedure and wish to proceed.

CONSENT FORM FOR GENERAL / REGIONAL ANAESTHESIA / MAC

GUC - 00084304.

Patient Name : Mrs. JEFFY JONE Age : 30yrs

Gender : M ☐ F ☑ - IP No : IP18 : 00036700 Consultant : Dr. PRIYADARSHINI S.M.

Ward / Bed No. : Anaesthesiologist : Dr. Chitti Subban

Operative procedure planned : labour Epidural Analgesia.

PLEASE READ THIS BEFORE YOU CONSENT FOR ANAESTHESIA

General anaesthesia involves rendering a patient unconscious before an operation. This ensures the patient is not aware of events and does not feel pain during the operation. Drugs given through a vein and / or inhaled from an anaesthesia machine produce it. Regional anaesthesia involves using a local anaesthetic to numb a specific area of the body for surgery: Prolonged pain relief without numbness can be achieved by infusing weak solutions of local anesthetics arid narcotic drugs to particular parts of the body after surgery or injury, using catheters.

Specific High Risk (s) : The doctors have explained to me the details of the high risk involved due to the following medical problems and I have sought necessary clarification on all my doubts.

☐ Heart disease ☐ Hypertension ☐ Diabetes mellitus ☐ Renal failure

☐ Hepatic disorders ☐ Shock ☐ Multiple organ failure ☐ Polytrauma / RTA

☐ Incapacitating COPD ☑ Others : Hypertension

Comments : .....

- Doctor to document in medical record also if necessary (Cross-out if not applicable)

DECLARATION BY PATIENT / GUARDIAN / PROXY

I hereby authorize Rainbow Hospital & its authorized doctors to perform upon me I my patient ..... the above mentioned operation I Diagnostic I Therapeutic procedures .....

I authorize and give consent for anaesthesia (☑ Regional / ☐ General Anesthesia / ☐ Monitored anesthesia care (MAC)) as considered appropriate by the anaesthetic team.

I acknowledge that the anaesthetists have informed me about the anaesthetic procedure, alternative treatments and answered my specific queries and concerns about this matter. I have read and understood the information provided in this form I acknowledge that I have discussed with the anaesthetists any significant risk and Complications specific to my individual circumstances, and I have considered them before Consenting for anesthesia.

I understand that there are some infrequent complications that can occur due to use of anaesthesia, these include pain or some injury at the site of injections, temporary breathing difficulties, asthmatic reactions, headaches.

I authorize the anaesthetic team to perform any additional procedures (for example, CVP line, arterial line, use of nerve blocks for pain relief, changing from regional to general anaesthesia etc), which are considered necessary by them during the course of surgery.

That I authorize and give consent to the team of doctors attending on me to administer blood products during the course of operative period and immediately thereafter in need arises.

I understand that the above mentioned consultant anesthesiologist or occasionally a colleague deputed by him I her will administer the Anaesthesia.

Pregnant: ☑ Yes ☐ No

DECLARATION BY THE ANAESTHETISTS PROVIDING INFORMATION FOR THIS CONSENT

I declare that I have explained the nature of General Anaesthesia / Regional Anaesthesia / MAC to be given and discussed the risks that particularly concern this patient.

I have given the patient an opportunity to ask questions and I have answered these.
