CONSENT FOR LOWER GI ENDOSCOPY

Children's Hospital | BirthRight BY RAINBOW HOSPITALS Your Right to a Safe Delivery

Patient Name: **Age:** **Sex:** M / F
Consultant: **Ward & Bed No.:** **UHID:**

Description of the Procedure

Lower GI Endoscopy is a visual examination of the lining of the colon or large intestine. A long, flexible tube (Colonoscope) is passed through the rectum and into the colon. Colonoscopy refers to examination of the entire length of the colon while in Sigmoidoscopy the distal part of the large intestine is visualized. Through the tube, the doctor will be able to look for any abnormalities that may be present. If necessary, small tissue samples (biopsies) can be taken for laboratory analysis. Polyps (abnormal growths of tissues) can also be removed using an electric snare wire and areas of bleeding can be treated by internal injection or the application of heat.

You / Your child will be made to lie on the left side and sometimes an intravenous sedative may be given. The doctor will pass the colonoscope through the anus into the rectum and advance it through the colon. You / Your child may experience some abdominal cramping and pressure from the air which is introduced into your colon. This is normal and will pass quickly. You may be asked to change position during the examination and you / your child will be assisted by a nurse. The examination takes on an average, 15 to 30 minutes.

Precautions

- To allow a clear view, the colon must be completely free of waste material. You / Your child must follow the instructions given by the doctor to ensure adequate bowel preparation
- You must inform the doctor or nurse if you/ your child have any allergies or have had previous endoscopic procedures or surgeries and bring all previous reports.
- You / Your child must remove your eyeglasses.

Risks

Colonoscopy can result in complications, such as reactions to medications, perforation (tear) of the intestine and bleeding. These are very rare (less than 1 in 1000 examinations), but may require urgent treatment including, rarely, surgery. The possibility of complications is increased when the scope is used for treatment, such as the removal of polyps.

CONSENT FOR THE PROCEDURE

1. My questions and concerns about my /my child's conditions, the procedure, cost, risks, and treatment options have been discussed with the doctor and answered to my satisfaction.
2. I have been advised of my / my child's medical conditions, the benefits and reason for the procedure as indicated by the clinical observations and/or diagnostics performed, the risks of not having the procedure, alternative tests I could have and their risks.
3. I recognize that no guarantees have been made regarding likelihood of success or outcomes and also whether the procedure will give the doctor any further information and that further tests may be needed. I also give consent for treatment through the scope if the situation warrants it.
4. I authorize Dr. Keerthi Rajan and such assistants and associates as may be selected by him/her to perform any part of the above procedure upon my self / my child.
5. As with any procedure, I am aware that risks such as blood loss, infection, change in blood pressure, heart failure, anesthetic/allergic reactions, etc. may arise necessitating attention. Therefore, besides consenting to the performance of the procedure, I also consent and authorise the rendering of such other care and treatment as my Doctor or his designee reasonably believes necessary.
6. I understand that biopsy tissue taken during this procedure will be kept for tests for a period of time.

7. I consent and agree to the administration of sedation by Dr. _____ or the performance of this procedure. I am aware of the risks of the sedation and also consent to supplementation with any other mode of anaesthesia if necessary.

8. I have informed the Doctor of all my / my child's previous illnesses, allergies, drug reactions, surgical procedures and all other facts relevant to my treatment. I shall not hold the Hospital or the Doctor responsible for the consequences which may arise from the non-disclosure of the same.

9. I give my consent for the administration of blood product transfusion during this procedure if required. I have been informed that despite careful screening in accordance with national and international regulations, there are rare instances of threatening infections such as AIDS, Hepatitis and other viruses or diseases as yet unknown for which screening tests do not exist. I also understand that unpredictable reactions may occur which include but are not limited to rash and shortness of breath, shock and in rare occasions death.

10. I consent to the photography or television of the procedure to be performed for the purpose of advancing medical education; or its publication in scientific journals provided my /my child's identity is not revealed by the pictures or descriptions in the accompanying texts. I also consent to and authorize the presence of and observation of this procedure by qualified observers, as may be authorized by the Rainbow childrens Hospitals Chennai and its regulatory laws and agencies.

11. I have been explained biological sample (Blood, Body Fluids, tissue) collected from my body for diagnostics tests or surgical resection along with the data may be given without disclosing my identity by Rainbow Doctor to research scientists affiliated with Rainbow childrens hospital for diagnostic or therapeutic research purpose. This will happen only if there is any sample leftover after its intended medical use. There will be no additional sample collected. This research use may not benefit me but will help in better understanding of disease and better treatment for other patients in future. I understand that I will not benefit from any potential commercial value that may result from this research and development activity. I have the option to disallow the research use of the left-over sample.

Please put a tick in the box below, if you do not agree to allow research use of the left-over sample:

☐ I do not agree to allow research use of the left-over samples ----------

12.CONSENT OF PATIENT/ PARENT REPRESENTATIVE / SURROGATE

Having understood the above I give my consent for me/ my child undergoing the above said procedure at Rainbow childrens Hospitals, Chennai and absolve the said Hospital, its doctors and the staff in the event of any complication.I acknowledge that I have had an opportunity to discuss this procedure, as stated above, with the doctor or doctor's designee, and thereby consent to this procedure.I, _____ (name/relationship to the patient), therefore, consent for the procedure to performed on me/ my child

Patient, be deemed advisable or necessary.

I understand that the confidentiality of all medical records shall be protected to the full extent of the Law. The undersigned also consent to the use of health related information/ audiovisuals of the patient for research & training purpose or for insurance coverage and while doing so confidentiality of the patient will be maintained at all times and this will not affect the care of the patient.

In giving my general consent to treatment, I understand that I retain the right to refuse any particular examinations, test, procedure, treatment, therapy or medication recommended or deemed medically necessary by treating doctors. I also understand that the practice of medicine is not an exact science and that no guarantee have been made to me as the results of my evaluation and I or treatment.

I understand that I shall not bring valuables to the Hospitals and that the Hospital will not be responsible for the loss, destruction or theft of my personal belongings. I assume full responsibility for all my personal items and release the Hospital from responsibility and liability for such personal items and valuables.

"I am aware that during the patient care it is inevitable that certain re-useable equipment shall be re-used after sterilization and disinfection. I am informed that the hospital assures maximum level of precaution and care in sterilizing and disinfecting the equipment and monitors the whole process as per evidence based guidelines".

Note:
1 We do not allow use of medication brought from outside by the patient.
2 I have received attendant passes as per my room category. I understand that I have to return it back at the time of final bill clearance. In case of failing the submission, I will pay 200/- Rs.
(Receivers Signature:.....)

3 IP Guide book has been given to me and I have been explained about the Hospitals rules and policies.
4 Financial and billing counseling has been done to me.

BILLING POLICY

- Billing Cycle: - Bed charges will be calculated based on 12PM to 12PM checkout. Settlement post 12PM, room rent will be charged for half day extra & post 6PM, it will be charged for full day. Less than 24 hours stay will be considered as one day.
- Room Rent inclusive of Bed, Nursing, Consultation Charges and all other charges, like Diet, Investigations, IP or OP Procedures, Equipment, Cross Consultations, Blood/ Blood Products, Implants, Ward Consumables, Infection Preventive Measure Charges, Pharmacy and Consumables will be charged extra.
- 5% GST Charges applicable on more than INR 5,000/- Bed Charges which was effective from 18.07.2022 as per the GST Council.
- As per the G.O.I. guidelines, we can collect Rs 1,99,999/- only in cash mode, balance patient can pay through Credit Card/ Debit Card/ NEFT / RTGS / Demand Draft and Online Payment.
- In the event of TPA / Cashless denial or approval not received due to any reason then hospital tariff will be applicable and any discount or special rates given to TPA's / Corporate won't 9eapplicable.
- If the Surgery/ Procedures performed in emergency hours (8PM-6AM), Public Holiday and on Sunday will be charged 30% extra.
- Asst. Surgeon and Anesthetist Charges will be charged 30% on the Surgeon Charges.
- Admission will be done according to the ward category chosen by the patient; charges will be applicable as per the ward category. All charges vary as per Room category, except Pharmacy and consumables.
- Patient / Guardian Self Attested Government ID proof is mandatory to submit at the admission.
- TPA/Insurance Processing Fee applicable for all Insurance Cases.
- In our hospital there is "No Discounts Policy". Kindly co-operate.
- No Duplicate/ Second copy of OP or IP bill will be issued.
- In case the patient is shifted from lower category to higher category, all the charges like consultant visits, investigations, operations and procedures etc. from the date of admission will be charged according to the higher category.
- If the patient is shifted to the ICU, the attendant should vacate the room. If the attender occupies the room, it will be charged as per dual occupancy.
- Room eligibility is purely subject to TPA approval. Proportionate difference of the bill amount is applicable in case the patient opts for higher category higher than the TPA approved, which has to paid by the patient and may not be reimbursed by the TPA / Insurance Company at later stage.
- For Non - Medicals, Disposables, Consumables, Infusion Pump, Taxes, Implants, HIV/ HbsAg, Medical Records, Insurance Processing Fee, Double Occupancy and Registration Charges, Etc., credit cannot be extended. These items are not payable to us as per insurance company norms (Depends on the TPA/Insurance Co. T&C).
- It takes time for cash discharge is a minimum 3-4hrs. and in the case of insurance, it will take a minimum 6-7hrs.
- Difference, if any between the final bill amount arid amount permitted / approved by the TPA or total bill amount in case of denial from TPA, has to be paid by the patient.
- Two attendants are permitted with patients in Deluxe, Private Rooms and only one is permitted in the rest of the categories of rooms. No attendant is permitted in ICU's.
- All the refunds more than Rs.5,000/- will be refunded through NEFT within 7 Bank working days.
- Patient attendant can collect for Interim/provisional bill of the patient from the billing section on daily basis. Interim Bill shall be based on the acknowledged services in HIS. Final Bill of the patient may vary from the Interim bill based on actual update taken on the day of discharge. It is requested that patients/attendants enquire daily about the bill amount from billing section and pay the outstanding as on that day. You are requested to clear your outstanding amount on daily basis before 12 PM. **Patient bill outstanding should not be increase more than 10,000/-**

DECLARATION

I have attended the Financial Counselling desk & understood the expected costs & other conditions applicable. In this case, the TPA/Insurance Company rejects the claim for whatsoever reasons at any point of time after discharge. I promise to settle the claim with the hospital as per Hospital Cash Tariff.

Pediatric [illegible] Physical Examination

Name: _____ Age/Sex _____

Information given by: Mother Relationship _____

Chief Presenting Complaints & Duration (Chronologically)

History of present illness :

A case of Neonatal Necrotizing Enterocolitis - perforation - Post laparotomy + Adhesion release + 2 ileocolic fistula dismantling repair + Transverse stoma to Rectal anastomosis (done on 23/3/26) + Liver Biopsy ↓

Now, c/o fever since yesterday afternoon
low grade recorded - 99.7°F
On Round the clock Paracetamol dosing since yesterday
H/o not passing stools since yesterday afternoon
No blood in stools / vomit / abdominal distension / abdominal pain. H/o passing flatus (+).
Oral intake fed
V.O good
Activity
Gained weight of 4.5 kgs in the last 3 months
Hence, admitted.

24/7/26
VBG done as OP
pH - 7.33
pCO_2 - 34.5
HCO_3^- - 17.8
lactate - 4.89

DRUG CHART

Date of Admission: 24/7 Drug Allergies: ..... ☐ Not known any Drug Allergies

FOR THE SAFETY OF THE PATIENT

GENERAL - Ensure that all patient details are entered above. ONLY A DOCTOR SHALL WRITE MEDICATION ORDERS.

DOCTOR - Please use only approved abbreviations (refer to Hospital's approved list of abbreviations).
- Use approved pharmaceutical names, BLOCK LETTERS, metric dosage. English instructions.
- Any changes in drug therapy must be ordered by a NEW PRESCRIPTION. Do not alter existing instructions.
- Discontinue a drug by drawing a line *I* through it and a similar line through subsequent recording panels.
- The date and time of stopping the drug along with the doctors name and sign must be mentioned.
- Only one chart should be in use at any one time. When the chart is full, a new supplement can be kept within this drug sheet folder.

NURSES - Nurses must follow strictly the FIVE RIGHTS before administration of medication.
1) Right Patient 2) Right Drug 3) Right Dosage 4) Right Route 5) Right Time
- AVOID TAKING VERBAL ORDERS. NO VERBAL ORDERS FOR HIGH RISK/HIGH ALERT MEDICINES (EXCEPT FIRST DOSE OF EPINEPHRINE DURING CPR). Follow Hospitals's Verbal Order Policy.

EARLY WARNING SCORE: CHILDREN'S UNIT

Date 25/7/26 Time:	4am	~~8am~~	7:30am
Doctor / Nurse / Family Concern?			

Temperature (°F): 98.2°F; 99°F; 99.3°F

Heart Rate (bpm) and Blood Pressure (mmHg) *: 98 / (74) / 62

Note: BP does not score in early warning scoring

Heart Rate (Number): 128b/m

Resp. Rate (bpm) (Over 1 Minute) *: 32

Resp Rate (Number): 32b/m

Resp Distress	Mod/ Severe		
	None / Mild	-	
Receiving O_2 (l/min)		RA	
O_2 Saturations (%)		98%	
Conscious Level	Normal	✓	
	Altered		
GCS *		15/15	
TOTAL SCORE Number of shaded boxes		0	
Pain Score		0	
Observer's Initials		[illegible]	

ACTIONS NB: Scores 3 should be recorded overleaf	
Score 1	: Continue normal observation by staff nurse
Score 2	: Shift in charge nurse to be informed and continue hourly observations
Score 3	: Shift in charge AND ER doctor/Floor Registrar to see and half hourly to hourly Observation to continue.
Score 4	: Shift in charge AND treating consultant(till 8 PM) or On call night duty consultant to see
Score 5 & 6	: Shift in charge AND PICU fellow or PICU consultant to be informed.

* NB: If GCS is below 12 or the Oxygen requirement is >3 Lit./min. , then irrespective of rest of the score, the Nurse MUST inform the PICU team.

CHILDREN'S OBSERVATION and EARLY WARNING SCORING TOOL

INSTRUCTIONS:

- The paediatric Early Warning Score i) seeks to identify the abnormal physiological finding seen during serious childhood illnesses and ii) offers a method to interpret such physiological derangements with clearly defined actions, ensuring that suitably experienced staff are involved with the care of the sickest children.
- The Early Warning Score does not replace clinical experience and acumen and should not be relied upon for such purpose.
- 6 clinical parameters are assessed and recorded as part of the child's routine clinical observation, providing a Early Warning Score between 0-6 (Higher Early Warning Score are seen in sicker children)
- Detailed actions are described according to increasing Early Warning Score.
- Some children with complex medical needs e.g. cyanotic heart disease may require modification to their trigger thresholds/ action plan- this should follow discussion with senior colleagues.
- Any Early Warning Score of 3 or above should be recorded below with details of any subsequent action initiated

Record Details when EARLY WARNING SCORE > 3			**Record Time of Review and Plan**		
Date	Time	Early Warning Score	Date	Time	Name

- If at any time additional help is required, call help – regardless of the Early Warning Score!
- Following a Early Warning Score assessment, senior help may be required

The SBAR communication tool (situation, background, assessment, recommendations) is a helpful mnemonic that can be used to describe a child's clinical condition to a colleague.

I	**IDENTITY:** I am (name), a nurse on ward (X). I am calling about (child X)
S	**SITUATION :** I am calling because I am concerned that ... (e.g. BP is low/high, pulse is XXX, Temperature is XX, Early Warning Score is XX)
B	**BACK GROUND :** Child (X) was admitted on (XX date) with (e.g. respiratory infection). They have had (X operation/ procedure/ investigation). Child (X)'s condition has changed in the last (XX mins). Their last set of observations were (XXX). The child's normal condition is ... (e.g. alert/ drowsy/ confused, pain free)
A	**ASSESSMENT :** I think the problem is (XXX) and I have ...(e.g. given O2/ analgesia, stopped the infusion), OR I am not sure what the problem is but child (X) is deteriorating, OR I don't know what's wrong but I am really worried.
R	**RECOMMENDATION :** I need you to ... come to see the child in the next (XX mins) AND I s there anything I need to do in the meantime ? (e.g. stop the fluid/ repeat observation)

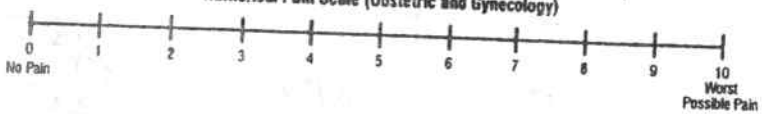
Re-assessment Frequency:
1. Every eight hours for all hospitalized patients.
2. For post-surgical patients, patients with chronic pain, patient with severe pain:
   a) At least every 2 hours for the first 24 hours
   b) Then every 4 hours.
   c) Prior to pain pain-relieving intervention.
   d) Within 30 – 60 minutes after pain relief intervention.

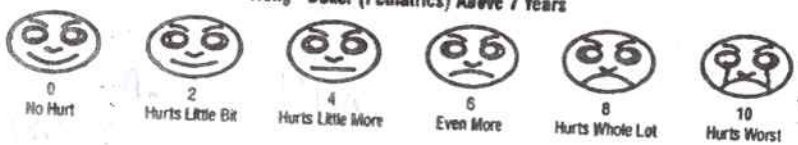
(P.T.O)

PAIN ASSESSMENT TOOLS

Numerical Pain Scale (Obstetric and Gynecology)



Wong - Baker (Pediatrics) Above 7 Years



FLACC PAIN ASSESSMENT SCALE (1 Month to 7 Years)

CATEGORY	SCORING		
	0	1	2
Face	No Particular expression or smile	Occasional Grimace or Frown, withdraw, Disoriented	Frequent to constant frown, quivering chin, clenched jaw
Legs	Normal Position or Relaxed	Uneasy, restless, tense	Kicking, or legs brawn up
Activity	Laying quietly normal position, moves easily	Squirming shifting back and forth, tense	Arched, right, or Jerking
Cry	No Cry (Awake or asleep)	Moans or whimpers occasional complaint	Crying steadily, screams of sobs, frequent complaints
Consolability	Content, relaxed	Reassured by occasional touching, hugging, or being talked to, distractible	Difficult to console or comfort

Neonatal Pain, Agitation and Sedation Scale (upto 1 Month)

Assessment Criteria	Sedation		Normal	Pain / Agitation	
	-2	-1	0	1	2
Crying Irritability	No Cry with painful stimuli	Moans or cries minimally with painful stimuli	Appropriate crying Not irritable	Irritable or crying at intervals consolable	High-pitched or silent-continuous cry Inconsolable
Behavior State	No arousal to any stimuli No spontaneous movement	Arouses minimally to stimuli Little spontaneous movement	Appropriate for gestational age	Restless, squirming Awakens frequently	Arching, kicking constantly awake or Arouses minimally / no movement (not sedated)
Facial Expression	Mouth is lax No expression	Minimal expression with stimuli	Relaxed Appropriate	Any pain expression intermittent	Any pain expression continual
Extremities Tone	No grasp reflex Flaccid tone	Weak grasp reflex decreased muscle tone	Relaxed hands and feet Normal Tone	Intermittent clenched toes, fists or finger splay Body is not tense	Continual clenched toes, fists, or finger splay Body is tense
Vital Signs HR RR, BP, SaO_2	No variability with stimuli Hypoventilation or apnea	Less than 10% variability from baseline with stimuli	Within baseline or normal for gestational age	Increase 10-20% from baseline SaO_2 76-85% with stimulation - quick recovery	Increase greater than 20% from baseline, SaO_2 less than or equal to 75% with stimulation - slow recovery Out of sync or fighting ventilator

Rainbow® Children's Hospital | BirthRight BY RAINBOW HOSPITALS

BRADEN 'Q' SCALE (1)

(for Paediatric use)

Patient Name : .....

Age..... Gender : ☐ F ☐ M

	1. Completely immobile: Does not make even slight changes in body or extremity position without assistance.	2. Very limited: Makes occasional slight changes in body or extremity position but unable to completely turn self independently.	3. Slightly limited: Makes frequent though slight changes in body or extremity position independently.	4. No limitations: Makes major and frequent changes in position without assistance.	N	M	E	N
Mobility					4	4	4	4
"Activity The degree of physical activity"	1. Bedfast : Confined to bed	2. Chairfast : Ability to walk severely limited or non-existent. Cannot bear own weight and/or must be assisted into chair or wheelchair."	3. Walks occasionally: Walks occasionally during day, but for very short distances, with or without assistance. Spends majority of each shift in bed or chair.	4. All patients too young to ambulate; OR walks frequently: Walks outside the room at least twice a day and inside room at least once every 2 hours during walking hours.	4	4	4	4
Sensory Perception	1. Completely limited: Unresponsive (does not moan, flinch or grasp) to painful stimuli due to diminished level of consciousness or sedation, OR, limited ability to feel pain over most of the body surface.	2. Very limited: responds to only painful stimuli, cannot communicate discomfort except by moaning or restlessness; OR, has sensory impairment that limits the ability to feel pain or discomfort over half of body.	3. Slightly limited: Responds to verbal commands, but cannot always communicate discomfort or need to be turned; OR, has some sensory impairment that limits ability to feel pain, or discomfort in one or two extremities.	4. No impairment: Responds to verbal commands. Has no sensory deficit that would limit ability to feel or communicate pain or discomfort.	4	4	4	4
Moisture Degree to which skin is exposed to moisture	1. Constantly moist: Skin is kept moist almost constantly by perspiration, urine, drainage, etc. Dampness is detected every time patient is moved or turned.	2. Very moist: Skin is often, but not always, moist. Linen must be changed at least every 8 hours.	3. Occasionally moist: Skin is occasionally moist, requiring linen change every 12 hours.	4. Rarely moist: Skin is usually dry, routine diaper changes; linen only requires changing every 24 hours.	4	4	4	4
FRICTION-SHEAR Friction Occurs when Skin moves against support surfaces Shear Occurs when skin and adjacent bony surface slide across one another	1. Significant problem: Spasticity, contracture, itching, or agitation leads to almost constant thrashing and friction.	2. Problem: Requires moderate to maximum assistance in moving. Complete lifting without sliding against sheets is impossible. Frequently slides down in bed or chair, requiring frequent repositioning with maximum assistance.	3. Potential problem: Moves freely or requires minimum assistance. During a move, skin probably slides to some extent against sheets, chair, restraints, or other devices. Maintains relative good position in chair or bed most of the time but occasionally slides down.	4. No apparent problem: Able to completely lift patient during position change, moves in bed and in chair independently and has sufficient muscle strength to lift up completely during move. Maintains good position in bed or chair at all times."	4	4	4	4
Nutritional Usual food intake pattern	1. Very Poor: NPO/or maintained on clear liquids, or IVs for more than 5 days OR albumin < 2.5 mg/dl OR never eats a complete meal. Rarely eats more than half of any food offered. Protein intake includes only 2 servings or meat or dairy products per day. Takes fluids poorly. Does not take a liquid dietary supplement.	2. Inadequate: Is on liquid diet or tube feedings/TPN, which provides inadequate calories and minerals for age OR albumin < 3 mg/dl OR rarely eats a complete meal and generally eats only about half of any food offered. Protein intake includes only 3 servings of meat or dairy products per day. Occasionally will take a dietary supplement.	3. Adequate: Is on tube feedings or TPN, which provide adequate calories and minerals for age OR eats over half of most meals. Eats a total of 4 servings of protein (meat, dairy products) each day. Occasionally will refuse a meal, but will usually take a supplement if offered.	4. Excellent: Is on a normal diet providing adequate calories for age. For example, eats most of every meal. Never refuses a meal. Usually eats a total of 4 or more servings of mean and dairy products. Occasionally eats between meals. Does not require supplementation.	1	1	1	1
Tissue Perfusion & Oxygenation	1. Extremely compromised: Hypotensive (MAP < 50 mm Hg; < 40 in a newborn) or the patient does not physiologically tolerate position changes.	2. Compromised: Normotensive oxygen saturation may be < 95%; hemoglobin may be < 10 mg/dl; capillary refill may be > 2 seconds; serum pH is < 7.40.	3. Adequate: Normotensive oxygen saturation may be < 95%; hemoglobin may be < 10 mg/dl; capillary refill may be 2 seconds; serum pH is normal.	4. Excellent: Normotensive, oxygen saturation > 95%; normal hgb; capillary refill < 2 seconds.	4	4	4	4

BRD-Q/NSG/04

Patient Name : .....

Age..... Gender : □

					Date : 26/2	26/2	27/2	28/2
Mobility	1. Completely immobile: Does not make even slight changes in body or extremity position without assistance.	2. Very limited: Makes occasional slight changes in body or extremity position but unable to completely turn self independently.	3. Slightly limited: Makes frequent though slight changes in body or extremity position independently.	4. No limitations: Makes major and frequent changes in position without assistance.	4	4	4	4
"Activity The degree of physical activity"	1. Bedfast : Confined to bed	2. Chairfast : Ability to walk severely limited or non-existent. Cannot bear own weight and/or must be assisted into chair or wheelchair."	3. Walks occasionally: Walks occasionally during day, but for very short distances, with or without assistance. Spends majority of each shift in bed or chair.	4. All patients too young to ambulate; OR walks frequently: Walks outside the room at least twice a day and inside room at least once every 2 hours during walking hours.	4	4	4	4
Sensory Perception	1. Completely limited: Unresponsive (does not moan, flinch or grasp) to painful stimuli due to diminished level of consciousness or sedation, OR, limited ability to feel pain over most of the body surface.	2. Very limited: responds to only painful stimuli, cannot communicate discomfort except by moaning or restlessness; OR, has sensory impairment that limits the ability to feel pain or discomfort over half of body.	3. Slightly limited: Responds to verbal commands, but cannot always communicate discomfort or need to be turned; OR, has some sensory impairment that limits ability to feel pain, or discomfort in one or two extremities.	4. No impairment: Responds to verbal commands. Has no sensory deficit that would limit ability to feel or communicate pain or discomfort.	4	4	4	4
Moisture Degree to which skin is exposed to moisture	1. Constantly moist: Skin is kept moist almost constantly by perspiration, urine, drainage, etc. Dampness is detected every time patient is moved or turned.	2. Very moist: Skin is often, but not always, moist. Linen must be changed at least every 8 hours.	3. Occasionally moist: Skin is occasionally moist, requiring linen change every 12 hours.	4. Rarely moist: Skin is usually dry, routine diaper changes; linen only requires changing every 24 hours.	4	4	4	4
FRICTION-SHEAR Friction Occurs when Skin moves against support surfaces Shear Occurs when skin and adjacent bony surface slide across one another	1. Significant problem: Spasticity, contracture, itching, or agitation leads to almost constant thrashing and friction.	2. Problem: Requires moderate to maximum assistance in moving. Complete lifting without sliding against sheets is impossible. Frequently slides down in bed or chair, requiring frequent repositioning with maximum assistance.	3. Potential problem: Moves freely or requires minimum assistance. During a move, skin probably slides to some extent against sheets, chair, restraints, or other devices. Maintains relative good position in chair or bed most of the time but occasionally slides down.	4. No apparent problem: Able to completely lift patient during position change, moves in bed and in chair independently and has sufficient muscle strength to life up completely during move. Maintains good position in bed or chair at all times."	4	4	4	4

Nursing General Admission Assessment Form For Pediatrics

Diagnosis: Fever & evaluation - ? enterocolitis
Arrival Time: 12.10am. Mode of Arrival: - Admitting From: ☑ ER ☐ OPD ☐ Direct

Allergy / Adverse Reaction ..... N.K.A ..... Body Weight: 11.4 Kg
..... Height: ..... cm
.....

Past Medical History: Obtained From ☐ Patient ☑ Family Member ☐ Medical Record ☐ Other (specify) .....

Past Medical History	Past Surgical History	Previous Hospital Admission
	post laparotomy & adhesiolysis, iliac fistula dismantling and suturing, transverse stoma to rectal anastomosis on 23/3/26. Cyst liver biopsy.	7/5/25 - for complicated SAM / MSSA sepsis. 19/7/25 - Albumin transfusion 5/4/26 - AOD - probable enterocolitis

Family History: ..... N.K.A .....
.....

Has the child or close family member had recent contact with a communicable disease? ☐ Yes ☑ No
If yes please list, ...
Was the child's birth normal? ☑ Yes ☐ No If No, please describe problems: .....
.....
Are the child's immunization up to date? ☐ Yes ☑ No

Current Medication: ☑ None ☐ Yes, If Yes, fill reconciliation form

Observations: Weight: 11.4 kg Length: - Head Circumference (< 2 years): -
Temp.: 97.9°F HR: 125 b/m RR: 32 b/m BP: 100/60 (72)
Pain Score: 0/10 Specify Site: - (Follow Pain Assessment Sheet & Document)
Fall Risk Assessment: ☐ Yes ☑ No Score: 0/10 25 (Document in the Humpty Dumpty Sheet)
Risk of Pressure Sore (Braden Q Score 0/10) (Document in the Braden Q Assessment Sheet)

Pain Screening: ☐ Yes ☑ No If Yes, Pain Score: ..... Pain Tool Used: ☐ N Pass ☑ FLACC ☐ Wong Baker
Character of Pain ..... Location ..... Frequency ..... Duration .....

FUNCTIONAL SCREENING: ☑ No Abnormalities Detected
☐ Mobility Problem ☐ Walking Problem
☐ Developmental Delay ☐ Musculoskeletal Congenital Abnormality

Inform consultant for positive criteria

NUTRITIONAL SCREENING: ☑ No Abnormalities Detected
☐ Underweight ☐ Overweight ☐ Special Feeding Method
☐ Feeding Problem ☐ Special diet ☐ No Abnormality Detected

Circulation / Colour: ☑ Normal ☐ Abnormal ☐ Bleeding

Work of Breathing: ☑ Normal ☐ Decreased ☐ Increased ☐ Gasping / Apnea

INITIAL PHYSIOLOGICAL STATUS

☑ Stable
☐ Unstable :
- ☐ Not – Life - Threatening
- ☐ Life – Threatening

Triage Classification	CTAS
☐ Level 1 : Resuscitation	☐ Immediate
☐ Level 2 : EMERGENT : Life or limb threatening	☐ < 15 min
☐ Level 3 : URGENT : Significant illness / injury with potential to become life or limb threatening	☐ 30 min
☐ Level 4 : LESS URGENT : Significant illness but not life threatening	☑ 60 min
☐ Level 5 : NON – URGENT : May receive care when convenient	☐ 120 min

NOTE : All immunocompromised children and preterm babies to be considered Level 2.
All Children less than 2 years age with high fever to be considered Level 3.

Signature of Parent / Guardian

* CTAS - Canadian Triage and Acuity Scale

Triage Completion Time : 2 min

Communicable Disease Triage Screening

PART A. The following questions should be asked to all patients at the initial screening:

1. Have you had fever (elevated temperature) in the past 2 weeks ☐ Yes ☑ No
2. Have you had cough or a rash in the past 2 weeks ☐ Yes ☑ No
3. Have you had shortness of breath or difficulty breathing in the past 2 weeks ☐ Yes ☑ No

PART B. For patients reporting fever and respiratory/rash symptoms: ☐ **Not applicable**

1. Have you travelled outside the INDIA? or had close contact with someone who has recently travelled outside the INDIA, in the past two weeks? ☐ Yes ☑ No
   If yes, State Location: .....
2. Are your parents / close contacts at home is/a healthcare worker? {please encircle the choices} (e.g., nurse, physician, ancillary services personnel, allied health services personnel, hospital volunteer, or laboratory worker, others) who has had a recent exposure to an individual with a highly communicable disease or unexplained, severe febrile respiratory or rash disease? ☐ Yes ☑ No

PART C. A positive communicable disease triage screening is considered for any patient who meets one of the two following criteria:

- ☐ Any patient with Fever / Rash / Vesicles / Discharge from Eyes and Cough
- ☐ Any patient with fever and respiratory symptoms who answered "YES" to any of the questions on epidemiologic risk factors in "PART B" of the triage screening above.

PART D. ACTION / INTERVENTION: (for positive suspected communicable disease triage screening)

- ☐ Patients should be immediately isolated in a negative pressure room or a single room (as appropriate) for pending evaluation.
- ☐ The patient should be given a surgical mask immediately, if not already wearing one.
- ☐ Both patient and triage staff should perform hand hygiene.
- ☐ The staff should use PPE (as appropriate).
