Address	15-6-212 BEGUM BAZAR, HYDERABAD, Begum Bazar, Hyderabad, Telangana, INDIA, 500012		
IP No	IP26-00006942	Admission Date	24-07-2026
Ref Doctor	Self.		
Discharge Date	26.07.2026		

Consultant:

Dr. S TEJASWI REDDY

MBBS, MD Pediatrics, DM Neonatology
APMC/FMR/94068

DIAGNOSIS	ICD CODE
TERM (39 weeks + 4 days)/AGA/BABY BOY	

History: Baby Of BINDIYA YADAV is a term (39 weeks + 4 days) baby boy, delivered to a G4P1L1A2 mother by spontaneous vaginal delivery on 24.07.2026 at 06:17 pm with birth weight of 2.74 kgs in Rainbow Children's Hospital, Himayathnagar, Hyderabad. Baby cried immediately after birth. Apgar scores were 8/10 at 1 min, 9/10 at 5 min. Inj. Vitamin K 1mg IM was given after delivery. Delayed cord clamping done. Fetal presentation was Vertex.

Maternal History: Mrs. BINDIYA YADAV is a 29 years old G4P1L1A2 mother.

G1 - 2022- FTNVD , female, 3kg, A&H

G2 - Spontaneous miscarriage at 2nd month.

G3 - Spontaneous miscarriage at 3rd month- D&C done.

G4 - Present pregnancy Spontaneous conception., had regular Antenatal checkup's, received 2 doses of Injection. Tetanus Toxoid. Antenatal scans were normal. No history of Pregnancy Induced hypertension/ Urinary Tract Infection/ Antepartum Haemorrhage/ Hypothyroidism/ Gestational Diabetes Mellitus/ Oligohydramnios/ Polyhydramnios/ Prolonged Rupture Of Membranes/ Fever.

Mother's Blood group is A positive. Baby's blood group is A positive.

Name	Baby Of BINDIYA YADAV	UHID	HNH-00016802
IP No	IP26-00006942	Admission Date	24-07-2026

Examination: Baby was euthermic (36.5 *C), euvolemic and was maintaining saturations at room air. On auscultation of chest, air entry was bilaterally equal with normal heart sounds. Bilateral femoral pulses well felt. Abdomen was soft with no organomegaly. Cry and activity were good. Anterior fontanelle was at level. No obvious external congenital anomalies were noted clinically. All external orifices were patent and open. All neonatal reflexes were normal.

Anthropometry:

Weight at birth : 2.74 kgs.
Weight at discharge : 2.68 kgs.
Head Circumference : 32 cms.
Length : 42 cms.

Investigations: Enclosed reports.

Management:

Course during hospital:

Feeding: Breast feeding was initiated (First feed was given within 30 minutes), measured feeds were started. Baby tolerated the feeds well.

Vaccination: Baby was given following vaccination:

Vaccine Name	Status	Date
BCG	Given	25.07.2026
OPV	Given	25.07.2026
HEPATITIS B	Given	25.07.2026

TEOAE (Transient Evoked Otoacoustic Emissions): Hearing test: To be done on follow up.

Newborn screening advanced / Newborn sreening-4 : To be done on follow up.

SPO2 : 98% at room air

Red Reflex: Present & Symmetrical

Hip Examination was normal.

Baby tolerating feeds well, hemodynamically stable, passed urine and meconium, hence being discharged with the following advice.

Name	Baby Of BINDIYA YADAV	UHID	HNH-00016802
IP No	IP26-00006942	Admission Date	24-07-2026

Condition at discharge: Baby is pink, warm, active and on direct breast feeds + measured feeds.

Advice:

Keep the baby clean & warm
Regular breast feeding
Continue direct breast feeds + measured feeds as advised.
Monitor urine output
Immunization as per schedule
Vitamin D3 Drops (1ml/800IU) 0.5ml once daily till further advice.
Nasoclear Nasal drops 2 drops in each nostril SOS for nose block.

Plan:

1. **Newborn screening advanced / Newborn screening-4/ Thyroid function test to be done on followup.**
2. **Hearing test (TEOAE-Transient Evoked Otoacoustic Emissions) to be done on followup.**
3. **Serum Bilirubin to be done / decided on followup.**

Review consultation with Dr. S TEJASWI REDDY on Monday (27.07.2026) at Himayalnagar with prior appointment **(Review consultation will be charged).**

Review back to Hospital: If baby is not feeding continuously for > 6 hours, If breathing fast, Fever or poor activity or lethargy, Bluish discolouration of lips, Increase in jaundice, Abnormal movements occurs.

The content of the patient discharge summary, medication, food & drug interaction, care to be provided at home, nutrition, immunization and safe parenting, when and how to obtain emergency care etc also have been explained by doctor in a language that I can understand and I acknowledge.

Parent/ Attender

In case of emergency contact 9154865030 emergency pediatrician on duty.

To take appointment for OPD consultation at Rainbow **Himayalnagar / Banjara Hills / Rainbow Clinic Madhapur / Kukatpally / Vikrampuri / LB Nagar** dial just one toll free number **18002122**.

EARLY WARNING SCORE: CHILDREN'S UNIT

Date:	Time: 8 PM	10	2	6
Doctor/Nurse/Family Concern?		pro	Am	Am
Temperature (°F)	98.5	98.5	98.5	98.5
Heart Rate (bpm)	140	140bpm	142bpm	141bpm
Blood Pressure (mmHg) *	140	140	140	140
Resp. Rate (bpm) (Over 1 Minute) *	40	40bpm	40bpm	42bpm
Resp Rate (Number)	40	40bpm	40bpm	42bpm
Resp Mod/ Severe Distress	None	None	None	None
Receiving O ₂ (l/min)	99%	99%	99%	99%
O ₂ Saturations (%)	99%	99%	99%	99%
Conscious Level	Normal	Normal	Normal	Normal
GCS *	15	15	15	15
TOTAL SCORE	0	0	0	0
Number of shaded boxes	0	0	0	0
Pain Score	0	0	0	0
Observer's Initials	TS	TS	TS	TS

ACTIONS

NB: Scores 3 should be recorded overleaf

- Score 1 : Continue normal observation by staff nurse
Score 2 : Shift in charge nurse to be informed and continue hourly observations
Score 3 : Shift in charge AND ER doctor/Floor Registrar to see and half hourly to hourly Observation to continue.
Score 4 : Shift in charge AND treating consultant(till 8 PM) or On call night duty consultant to see
Score 5 & 6 : Shift incharge and PICU/NICU fellow or PICU/NICU consultant to be informed

* NB: If GCS is below 12 or the Oxygen requirement is >3 Lit./min. , then irrespective of rest of the score, the Nurse MUST inform the PICU team.

CHILDREN'S OBSERVATION
and EARLY WARNING SCORING TOOL

INSTRUCTIONS:

- The paediatric Early Warning Score i) seeks to identify the abnormal physiological finding seen during serious childhood illnesses and ii) offers a method to interpret such physiological derangements with clearly defined actions, ensuring that suitably experienced staff are involved with the care of the sickest children.
- The Early Warning Score does not replace clinical experience and acumen and should not be relied upon for such purpose.
- 6 clinical parameters are assessed and recorded as part of the child's routine clinical observation, providing a Early Warning Score between 0-6 (Higher Early Warning Score are seen in sicker children)
- Detailed actions are described according to increasing Early Warning Score.
- Some children with complex medical needs e.g. cyanotic heart disease may require modification to their trigger thresholds/ action plan- this should follow discussion with senior colleagues.
- Any Early Warning Score of 3 or above should be recorded below with details of any subsequent action initiated

Record Details when EARLY WARNING SCORE > 3			Record Time of Review and Plan		
Date	Time	Early Warning Score	Date	Time	Name

- If at any time additional help is required, call help – regardless of the Early Warning Score!
- Following a Early Warning Score assessment, senior help may be required

The SBAR communication tool (situation, background, assessment, recommendations) is a helpful mnemonic that can be used to describe a child's clinical condition to a colleague.

I	IDENTITY: I am (name), a nurse on ward (X). I am calling about (child X)
S	SITUATION : I am calling because I am concerned that ... (e.g. BP is low/high, pulse is XXX, Temperature is XX, Early Warning Score is XX)
B	BACK GROUND : Child (X) was admitted on (XX date) with (e.g. respiratory infection). They have had (X operation/ procedure/ investigation). Child (X)'s condition has changed in the last (XX mins). Their last set of observations were (XXX). The child's normal condition is ... (e.g. alert/ drowsy/ confused, pain free)
A	ASSESSMENT : I think the problem is (XXX) and I have ...(e.g. given O2/ analgesia, stopped the infusion), OR I am not sure what the problem is but child (X) is deteriorating, OR I don't know what's wrong but I am really worried.
R	RECOMMENDATION : I need you to ... come to see the child in the next (XX mins) AND I s there anything I need to do in the meantime ? (e.g. stop the fluid/ repeat observation)

BRADEN 'Q' SCALE

					Date :	24/7/26	25/7/26	25/7/26	25/7/26
					Time :	8pm	N/A	urrg	N/A
Mobility	1. Completely immobile: Does not make even slight changes in body or extremity position without assistance.	2. Very limited: Makes occasional slight changes in body or extremity position but unable to completely turn self independently.	3. Slightly limited: Makes frequent through slight changes in body or extremity position independently.	4. No limitations: Makes major and frequent changes in position without assistance.		4	4	4	4
'Activity The degree of physical activity'	1. Bedfast : Confined to bed	2. Chairfast : Ability to walk severely limited or non-existent. Cannot bear own weight and/or must be assisted into chair or wheelchair."	3. Walks occasionally: Walks occasionally during day, but for very short distances, with or without assistance. Spends majority of each shift in bed or chair.	4. All patients too young to ambulate; OR walks frequently: Walks outside the room at least twice a day and inside room at least once every 2 hours during walking hours.		4	4	4	3
Sensory Perception	1. Completely limited: Unresponsive (does not moan, flinch or grasp) to painful stimuli due to diminished level of consciousness or sedation, OR, limited ability to feel pain over most of the body surface.	2. Very limited: Responds to only painful stimuli, cannot communicate discomfort except by moaning or restlessness; OR, has sensory impairment that limits the ability to feel pain or discomfort over half of body.	3. Slightly limited: Responds to verbal commands, but cannot always communicate discomfort or need to be turned; OR, has some sensory impairment that limits ability to feel pain, or discomfort in one or two extremities.	4. No impairment: Responds to verbal commands. Has no sensory deficit that would limit ability to feel or communicate pain or discomfort.		4	4	4	3
Moisture Degree to which skin is exposed to moisture	1. Constantly moist: Skin is kept moist almost constantly by perspiration, urine, drainage, etc. Dampness is detected every time patient is moved or turned.	2. Very moist: Skin is often, but not always, moist. Linen must be changed at least every 8 hours.	3. Occasionally moist: Skin is occasionally moist, requiring linen change every 12 hours.	4. Rarely moist: Skin is usually dry, routine diaper changes; linen only requires changing every 24 hours.		4	4	4	4
FRICION-SHEAR Friction Occurs when Skin moves against support surfaces Shear Occurs when skin and adjacent bony surface slide across one another	1. Significant problem: Spasticity, contracture, itching, or agitation leads to almost constant thrashing and friction.	2. Problem: Requires moderate to maximum assistance in moving. Complete lifting without sliding against sheets is impossible. Frequently slides down in bed or chair, requiring frequent repositioning with maximum assistance.	3. Potential problem: Moves freely or requires minimum assistance. During a move, skin probably slides to some extent against sheets, chair, restraints, or other devices. Maintains relative good position in chair or bed most of the time but occasionally slides down.	4. No apparent problem: Able to completely lift patient during position change, moves in bed and in chair independently and has sufficient muscle strength to life up completely during move. Maintains good position in bed or chair at all times."		4	4	4	4
Nutritional Usual food intake pattern	1. Very Poor: NPO/or maintained on clear liquids, or IVs for more than 5 days OR albumin < 2.5 mg/dl OR never eats a complete meal. Rarely eats more than half of any food offered. Protein intake includes only 2 servings or meat or dairy products per day. Takes fluids poorly. Does not take a liquid dietary supplement.	2. Inadequate: Is on liquid diet or tube feedings/TPN, which provides inadequate calories and minerals for age OR albumin < 3 mg/dl OR rarely eats a complete meal and generally eats only about half of any food offered. Protein intake includes only 3 servings of meat or dairy products per day. Occasionally will take a dietary supplement.	3. Adequate: Is on tube feedings or TPN, which provide adequate calories and minerals for age OR eats over half of most meals. Eats a total of 4 servings of protein (meat, dairy products) each day. Occasionally will refuse a meal, but will usually take a supplement if offered.	4. Excellent: Is on a normal diet providing adequate calories for age. For example, eats most of every meal. Never refuses a meal. Usually eats a total of 4 or more servings of meat and dairy products. Occasionally eats between meals. Does not require supplementation.		3	4	4	4
Tissue Perfusion & Oxygenation	1. Extremely compromised: Hypotensive (MAP < 50 mm Hg; < 40 in a newborn) or the patient does not physiologically tolerate position changes.	2. Compromised: Normotensive oxygen saturation may be < 95%; hemoglobin may be < 10 mg/dl; capillary refill may be > 2 seconds; serum pH is < 7.40.	3. Adequate: Normotensive oxygen saturation may be < 95%; hemoglobin may be < 10 mg/dl; capillary refill may be 2 seconds; serum pH is normal.	4. Excellent: Normotensive, oxygen saturation > 95%; normal hgb; capillary refill < 2 seconds.		3	4	4	4
TOTAL SCORE						26	28	28	26
Evaluator's Name						Dr	Dr	Dr	Dr

Severe Risk : less than 9 | High Risk : 10-12 | Moderate Risk : 13-14 | Mild Risk : 15-18 | Not at Risk: 19-23

Risk Score	Category	Action	Support Surfaces (Please Note: Only required for children who are deemed at risk due to altered mobility, consider occupation therapy referral for advice)
15-18	At Risk	• Regular Turning Schedule • Enable as much activity as possible • Protect the heels • Use pressure redistribution surfaces • Manage moisture, friction and shear • Advance to a higher level of risk if other major risk factors are present	High density foam mattress Gel pads for high-risk areas Alternating pressure mattress overlay
13-14	Moderate Risk	• Use the Same Protocol as for “At Risk” Patients • Position patient at 30 degree lateral incline using foam wedges	High density foam mattress Gel pads for high-risk areas Alternating pressure mattress overlay
10-12	High Risk	• Follow the same protocol as for “Moderate Risk” Patients • In addition to regular turning schedule • Make small shifts in their position frequently	High density foam mattress Gel pads for high-risk areas Alternating pressure mattress overlay
Less than 9	Severe Risk	• Use same protocol as for “High Risk” Patients • Add a pressure redistribution surface for patients with severe pain or with additional risk factors.	High density foam mattress Gel pads for high-risk areas Alternating pressure mattress overlay

Potential problem: Moves freely or requires minimum assistance. During a move, skin probably slides to some extent against sheets, chair, restraints, or other devices. Maintains relative good position in chair or bed most of the time but occasionally slides down.	4. No apparent problem: Able to completely lift patient during position change, moves in bed and in chair independently and has sufficient muscle strength to life up completely during move. Maintains good position in bed or chair at all times."	4			
Nutritional Usual food intake pattern	1. Very Poor: NPO/or maintained on clear liquids, or IVs for more than 5 days OR albumin < 2.5 mg/dl OR never eats a complete meal. Rarely eats more than half of any food offered. Protein intake includes only 2 servings or meat or dairy products per day. Takes fluids poorly. Does not take a liquid dietary supplement.	2. Inadequate: Is on liquid diet or tube feedings/TPN, which provides inadequate calories and minerals for age OR albumin < 3 mg/dl OR rarely eats a complete meal and generally eats only about half of any food offered. Protein intake includes only 3 servings of meat or dairy products per day. Occasionally will take a dietary supplement.	3. Adequate: Is on tube feedings or TPN, which provide adequate calories and minerals for age OR eats over half of most meals. Eats a total of 4 servings of protein (meat, dairy products) each day. Occasionally will refuse a meal, but will usually take a supplement if offered.	4. Excellent: Is on a normal diet providing adequate calories for age. For example, eats most of every meal. Never refuses a meal. Usually eats a total of 4 or more servings of meat and dairy products. Occasionally eats between meals. Does not require supplementation.	4			
Tissue Perfusion & Oxygenation	1. Extremely compromised: Hypotensive (MAP < 50 mm Hg; < 40 in a newborn) or the patient does not physiologically tolerate position changes.	2. Compromised: Normotensive oxygen saturation may be < 95%; hemoglobin may be < 10 mg/dl; capillary refill may be > 2 seconds; serum pH is < 7.40.	3. Adequate: Normotensive oxygen saturation may be < 95%; hemoglobin may be < 10 mg/dl; capillary refill may be 2 seconds; serum pH is normal.	4. Excellent: Normotensive, oxygen saturation > 95%; normal hgb; capillary refill < 2 seconds.	4			
					TOTAL SCORE	28		
					Evaluator's Name	DR		

Severe Risk : less than 9 | High Risk : 10-12 | Moderate Risk : 13-14 | Mild Risk : 15-18 | Not at Risk: 19-23

Risk Score	Category	Action	Support Surfaces (Please Note: Only required for children who are deemed at risk due to altered mobility, consider occupation therapy referral for advice)
15-18	At Risk	• Regular Turning Schedule • Enable as much activity as possible • Protect the heels • Use pressure redistribution surfaces • Manage moisture, friction and shear • Advance to a higher level of risk if other major risk factors are present	High density foam mattress Gel pads for high-risk areas Alternating pressure mattress overlay
13-14	Moderate Risk	• Use the Same Protocol as for "At Risk" Patients • Position patient at 30 degree lateral incline using foam wedges	High density foam mattress Gel pads for high-risk areas Alternating pressure mattress overlay
10-12	High Risk	• Follow the same protocol as for "Moderate Risk" Patients • In addition to regular turning schedule • Make small shifts in their position frequently	High density foam mattress Gel pads for high-risk areas Alternating pressure mattress overlay
Less than 9	Severe Risk	• Use same protocol as for "High Risk" Patients • Add a pressure redistribution surface for patients with severe pain or with additional risk factors.	High density foam mattress Gel pads for high-risk areas Alternating pressure mattress overlay

NEONATAL PAIN AGITATION SEDATION SCORE (N-PASS)

Assessment Criteria	Sedation		Normal	Pain / Agitation		Date	Date	Date	Date	Date	Date	Date	Date
	-2	-1	0	1	2	Time	Time	Time	Time	Time	Time	Time	Time
						24/7	24/7	25/7/26	25/7	26/7/26

NPASS: Neonatal Pain, Agitation & Sedation Scale

	Sedation	Pain / Agitation
How to use	- Observe the infant for a minute before selecting a score for each behavior. - Stimulate the infant and observe and select a score for each behavior. - Select only one numeric value (Highest) per behavior.	- Observe the infant for a minute before selecting a score for each behavior. - Select only one numeric value per behavior.
Scoring/ Documentation	- Sedation scores are negative scores only - Add the scores from the 5 individual behavior areas to generate a total NPASS Sedation score. (Do not add points for correcting gestational age) - NPASS Sedation total score has a range from 0 to -10 possible. - Document total NPASS Sedation score in the medical record.	- Pain/Agitation scores are positive scores only - Determine if scoring needs to be adjusted based on the patient's gestational age. See Premature Pain Assessment criteria. - Add the scores from the 5 individual behavior areas and for corrected gestational age (if indicated) to generate a total NPASS Pain/Agitation score. - NPASS Pain/Agitation total score has a range from 0 to 13 possible. - Document the total NPASS Pain/Agitation score in the medical record
Interpretation	- Desired levels of sedation vary according to the situation. - Discuss and determine sedation goal with provider. "Deep sedation": goal score of -10 to -5 - Deep sedation is not recommended unless an infant is receiving ventilator support, related to the high potential for hypoventilation and apnea "Light sedation": goal score of -5 to -2 - Reassess patient per frequency in local sedation policy - A negative score without the administration of opioids/ sedatives may indicate: - The premature infant's response to prolonged or persistent pain/stress - Neurologic depression, sepsis, or other pathology	- Does not provide pain intensity rating. - Any score greater than 3 indicates the possibility of the presence of pain in the infant - Continue evaluation to determine individualized patient interventions (non-pharmacological and pharmacological). - Reassess patient per frequency of local pain policy. - If upon reassessment, the NPASS pain/agitation total score remains consistent or higher, consider pharmacologic intervention.

GENERAL CONSENT FOR TREATMENT

Patient Name: Baby Of BINDIYA YADAV Age : 0 Y 0 M 0 D 2 H
IP No: IP26-00006942 Sex: Male
Consultant: Dr. S TEJASWI REDDY Ward/Bed No: 4F -OT/CRDL-HNPDA-412-1

The undersigned patient and I or responsible relative or person hereby consent to and authorize Rainbow Hospitals doctors and medical personnel to perform medical examinations, conduct routine investigations and administer medical treatments, outpatient procedures, minor dressings, vaccinations and immunizations during the course of the patient's care, as in patient.

patient, be deemed advisable or necessary.

I understand that the confidentiality of all medical records shall be protected to the full extent of the Law. The undersigned also consent to the use of health related information/ audiovisuals of the patient for research & training purpose or for insurance coverage and while doing so confidentiality of the patient will be maintained at all times and this will not affect the care of the patient.

In giving my general consent to treatment, I understand that I retain the right to refuse any particular examinations, test, procedure, treatment, therapy or medication recommended or deemed medically necessary by treating doctors. I also understand that the practice of medicine is not an exact science and that no guarantee have been made to me as the results of my evaluation and I or treatment.

I understand that I shall not bring valuables to the Hospitals and that the Hospital will not be responsible for the loss, destruction or theft of my personal belongings. I assume full responsibility for all my personal items and release the Hospital from responsibility and liability for such personal items and valuables.

"I am aware that during the patient care it is inevitable that certain re-useable equipment shall be re-used after sterilization and disinfection. I am informed that the hospital assures maximum level of precaution and care in sterilizing and disinfecting the equipment and monitors the whole process as per evidence based guidelines".

Note:

1 We do not allow use of medication brought from outside by the patient.

2 I have received attendant passes as per my room category. I understand that I have to return it back at the time of final bill clearance. In case of failing the submission, I will pay 200/- Rs.

(Receivers Signature: *[Signature]*)

3 IP Guide book has been given to me and I have been explained about the Hospitals rules and policies.

4 Financial and billing counseling has been done to me.
