

Backup plans info

How it works

Backup plans facilitate repeated backups of data.

Backup plans

Back up data on a repeat basis by creating a backup plan. Backup plans can be customized to ensure specific resources are backed up according to an optimized schedule. [Learn more about backup plans.](#)

[Create backup plan](#)

Recovery points

Backups created by backup plans are called Recovery Points, and they can be viewed in the backup vaults specified by each plan. [Learn more about backup vaults.](#)

[View backup vaults](#)

Compliance monitoring

Backup plans can be monitored for compliance via Backup Audit Manager. [Set up compliance monitoring with frameworks.](#)

[View compliance reports](#)

Backup plans (2) info

Backup plans define your backup requirements, including backup schedules, backup retention rules and lifecycle rules.
